

# Coast, Canyons, and Trails

The study area includes the cities of San Diego, Santee, and El Cajon, as well as the County of San Diego. Major transportation facilities in the study area include SR 52, portions of SR 67, and their connections with I-5, I-8, I-805, SR 163, I-15, and SR 125. Existing transit services include the Green and Orange Line Trolley and multiple local bus routes. This corridor connects two major employment centers – Kearny Mesa and University City/Sorrento Valley – with East San Diego County and provides connections to activity centers including Marine Corps Air Station Miramar, universities, and shopping centers.

## PROJECT OVERVIEW

SANDAG and Caltrans are developing a Comprehensive Multimodal Corridor Plan (CMCP) for the Coast, Canyons, and Trails Corridor.

The Coast, Canyons, and Trails CMCP aims to guide the development of an innovative transportation network, transforming the way people and goods move east and west through the central San Diego region. This CMCP evaluates all travel modes and transportation facilities in the Coast, Canyons, and Trails study area and tailors solutions for the travel needs of the corridor. The study aims to integrate these modes to provide a seamless travel experience.

The Coast, Canyons, and Trails corridor plan is anticipated to be finalized by late 2021.

## OBJECTIVES AND PLANNING

### CORRIDOR AREA BENEFITS AND KEY CONSIDERATIONS

The primary objectives of the Coast, Canyons, and Trails CMCP are to:

- Improve public safety and security
- Develop and preserve an accessible multimodal transportation system for all users
- Promote and practice environmental stewardship while supporting a vibrant economy
- Foster livable and healthy communities that promote social equity
- Advance efficient, resilient, and innovative approaches to developing and delivering transformative projects
- Providing connections between communities with diverse land uses and the project area’s unique natural environment

## ABOUT CMCPs

In coordination with agency partners, SANDAG and Caltrans are developing a total of 11 CMCPs, five of which are currently underway. CMCPs are data-driven plans that offer solutions to help reduce congestion in highly traveled corridors by providing more transportation choices for residents, commuters, visitors, and goods movement, while preserving the character of the local community and creating opportunities for neighborhood enhancement projects. Completing the CMCPs will help the San Diego region compete for local, state, and federal funds, including SB 1 funding. Please visit [SANDAG.org/CoastCanyonsTrails](http://SANDAG.org/CoastCanyonsTrails) for more information.

## OPPORTUNITIES FOR INVOLVEMENT

- Sign up for CMCP updates
- Stakeholder presentations
- Virtual public workshops
