							and connectivity for more efficient, accessible and reliable transit operations within the region's multi-modal system. This project will leverage existing social equity resources to develop a stakeholder engagement plan that incorporates the needs and opinions from historically marginalized groups and communities. Deliverables include a toolbox of near-term, low-cost transit priority measures; guidance for assessment of a region's investments; performance measures; and cost estimates for pilot project recommendations. Recommendations from this study could be replicated throughout the county and statewide to address the growing need for near-term solutions for a balanced, multimodal regional transportation network.
5	Blue Line Express Feasibility Study	San Diego	TBD	March 2023	\$700K	8 and 1	Feasibility assessment of operating an express trolley along the blue line corridor between San Ysidro and
