- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Francisco Cevallos De Cima      8/29/2019 9:41:47 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Sara Nese      8/29/2019 9:14:52 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Tim O'Brien 8/29/2019 9:08:57 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Ramona Loiselle      8/29/2019 9:02:00 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**William McSwain      8/29/2019 8:44:19 PM**

Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Evan Piritz    8/29/2019 8:36:44 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Paul Rubillo 8/29/2019 8:17:49 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. ## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Murray Smith      8/29/2019 7:30:47 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Peter Scheu      8/29/2019 7:13:56 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Joseph Whalen      8/29/2019 6:56:32 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Scott Dugan      8/29/2019 6:41:16 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Karen Lafferty 8/29/2019 6:05:22 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Cecilia Roa      8/29/2019 5:56:25 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Brad Sorensen      8/29/2019 5:44:39 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Ken Bryan      8/29/2019 5:35:15 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. - Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Ignacio Hernandez      8/29/2019 5:20:33 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Dixie McCarthy     8/29/2019 5:04:06 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Carrie Davis 8/29/2019 4:59:51 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Daniel De Laurentis      8/29/2019 4:41:34 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Patrick Kiernan 8/29/2019 4:33:40 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Ronald Lenert      8/29/2019 4:28:43 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Nancy Schrum      8/29/2019 4:24:33 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.

The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Cynthia O'Brien     8/29/2019 4:13:09 PM**

## Objection to Proposed 1000+ Units for Coronado

Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Blossom Sanger 8/29/2019 4:09:20 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Jennifer Orozco      8/29/2019 3:49:12 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Russell Broyles      8/29/2019 3:36:35 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Jamie Jamison      8/29/2019 3:31:39 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Michelle Hundley 8/29/2019 3:25:47 PM**

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. ## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Mary Ann Thomas      8/29/2019 3:19:37 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Ronald Chandler      8/29/2019 3:04:15 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**Christa Lausted 8/29/2019 3:01:18 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

**David Lassiter      8/29/2019 2:48:58 PM**

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.

- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.
- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

## **Objection to Proposed 1000+ Units for Coronado**

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

### **Coronado is constrained unlike any other city in San Diego County.**

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

### **The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.**

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. **Richard Bailey      8/29/2019 12:39:51 PM**

From: Terry Gaasterland, Ph.D., Del Mar, CA

To: Members of the SANDAG Board

Dear Board Members:

I write to you to expand on the first of three concerns laid out in my red-dot letter dated September 4, 2019 – the math errors and assumptions in the calculation of the housing units allocated to SANDAG.

***In light of Newport Beach's September 4, 2019, letter to SCAG staff, there are strong reasons to revisit the RHNA allocation to SANDAG from the State's Department of Housing and Community Development.***

Newport Beach provides a cogent case for reducing the SCAG RHNA number by half. The elements of Newport Beach's case that pertain to SANDAG are

- Rejection of Overcrowding adjustment
- Rejection of Vacancy adjustment

**The overcrowding adjustment adds 38,700 to the SANDAG allotment.** Overcrowding occurs when multiple households live in one housing unit, or bedrooms have too many occupants. However, overcrowding would already be accounted for in the calculation of households in Line 4 of the calculation table. The calculation assumes that in each age-range, a certain percent of people are a head-of-household, for example, 9.98% of people aged 15-24. The sum total is the projected number of households that need a home right now. Newport Beach rejects adjusting for overcrowding.

**The Vacancy adjustment adds 31,500 to the SANDAG allotment.** A vacant unit is one where a household has moved out and no new household has moved in yet - or a new, unsold unit. Newport Beach notes vacancy rates are generally higher for rentals than for owner-occupied homes. The State is aiming for a blanket vacancy rate of 5% in the RHNA calculation. Newport Beach rejects adjusting for vacancy.

One more adjustment is used in the calculation. Arguably, this adjustment should be rejected as well.

**The Replacement adjustment adds 6,255 to San Diego County's allotment.** The idea here is that units are taken out of the pool of usable homes when they are torn down to be rebuilt. Since these units are already not occupied, they would already not be in the Occupied Units in the first place (line 9 of the calculation table). So no replacement adjustment needed.

***If the three adjustments were removed – and the MATH DONE CORRECTLY, the total allocation to SANDAG would be 95,236 units, not 171,685.***

**One final remark on the math errors in the RHNA calculation worksheet:** Some have noted that the 171,685 number is only off by 2 (or 7). This is immaterial because

- The table has 14 calculations.
- 13 are wrong.
- The largest magnitude for a single math error is off by 48.

Thus, the **MATH ERROR RATE is 93% -- 13 calculations of 14 are incorrect.** This level of error rate is unacceptable.

***The responsible action is to revisit the RHNA allocation from the State to SANDAG especially in light of the Newport Beach argument for rejecting the RHNA allocation from the State to SCAG.*** (<http://www.scag.ca.gov/programs/Documents/090519NewportBeach.pdf>)

9.	<i>- Occupied Units (HHs) estimated January 1, 2020</i>			<i>-1,155,883</i>
	<b>6<sup>th</sup> Cycle Regional Housing Need Assessment (RHNA)</b>			<b>171,685</b>

Explanation and Data Sources

1. Projection period: Gov. Code 65588(f) specifies RHNA projection period start is December 31 or June 30, whichever date most closely precedes end of previous RHNA projection period end date. RHNA projection period end date is set to align with planning period end date. The planning period end date is eight years following the Housing Element due date, which is 18 months following the Regional Transportation Plan adoption rounded to the 15<sup>th</sup> or end of the month.
- 2-5. Population, Group Quarters, Household Population, & Projected Households: Pursuant to Government Code Section 65584.01, projections were extrapolated from Department of Finance (DOF) projections. Population reflects total persons. Group Quarter Population reflects persons in a dormitory, group home, institute, military, etc. that do not require residential housing. Household Population reflects persons requiring residential housing. Projected Households reflect the propensity of persons, by age groups, to form households at different rates based on Census trends.
6. Vacancy Adjustment: HCD applies a vacancy adjustment (standard 5% maximum to total housing stock) and adjusts the percentage based on the County's current "for rent and sale" vacancy percentage to provide healthy market vacancies to facilitate housing availability and resident mobility. Adjustment is difference between standard 5% vacancy rate and County's current vacancy rate based on the 2012-2016 American Community Survey (ACS) data.
7. Overcrowding Adjustment: In Counties where overcrowding is greater than the U.S. overcrowding rate of 3.34%, HCD applies an adjustment based on the amount the County's overcrowding rate exceeds the U.S. overcrowding rate. Data is from the 2012-2016 ACS.
8. Replacement Adjustment: HCD applies a replacement adjustment between 0.5% and 5% to total housing stock based on the current 10-year annual average percent of demolitions, applied to length of the projection period. Data is from County local government housing survey reports to DOF.
9. Occupied Units: This figure reflects DOF's estimate of occupied units at the start of the January closest to the projection period start date, per DOF E-5 report.

Los Angeles, CA 90017

**Subject: Support of SCAG Objection to HCD 6<sup>th</sup> RHNA Cycle Allocation**

Dear Mr Ajise:

The City of Newport Beach supports SCAG staff's recommendation to file an Objection to the state Department of Housing and Community Development's (HCD) determination of 1,344,740 units. As noted in the staff report for Agenda Item 2, HCD did not comply with provisions of Government Code Section 65584.01 and utilizes data and analysis that is unreasonable. In addition to the facts raised in the staff report, the City respectfully requests that the Regional Council and CEHD Committee consider the following additional comments:

- The total RHNA allocation of 1,344,740 units is more than three times the total SCAG RHNA of 412,137 for the 5<sup>th</sup> cycle. We recognize that the 5<sup>th</sup> RHNA was affected by conditions brought about by the recession, such as "credit" for unusually high vacancy rates in some areas. However, the 6<sup>th</sup> RHNA is also nearly double the 4<sup>th</sup> cycle allocation of 699,368, which was adopted in 2007 prior to the onset of the recession.
- According to HCD's August 22, 2019, letter, only 551,499 units (41 percent) of the total allocation is attributable to the projected growth in households while more than 580,000 units are based on "existing need" factors of overcrowding and cost burden. SCAG's RHNA Subcommittee had lengthy discussions regarding a fair method of addressing existing need, including the appropriateness of assigning RHNA totals that would eliminate existing need that developed over decades in a single planning cycle. Just as it would be unreasonable for the equity adjustment to attempt to fully equalize jurisdictions' income distributions in a single-RHNA cycle, it would also be unreasonable to allocate the region's entire existing need in a single cycle.
- Under recent changes to RHNA law, existing needs such as overcrowding and cost burden are mentioned as "factors" to be considered along with several others (Government Code Sec. 65584.01(b)). State law is silent on the relative weight to be assigned to existing need and projected need.

The “RHNA objectives” are set forth in Sec. 65584(d). Not one of the five stated objectives is related to overcrowding, and yet 34 percent of HCD’s allocation is attributable to overcrowding.

In Sec. 65584.01(c) we find this mandate: “The region’s existing and projected housing need shall reflect the achievement of a feasible balance between jobs and housing within the region using the regional employment projections in the applicable regional transportation plan.” This mandate bears no relationship to existing need factors such as overcrowding and cost burden.

Given the lack of policy direction provided by the State Legislature on the prioritization of existing need, it seems difficult to justify a RHNA allocation in which overcrowding and cost burden represent 580,000 units, or 43 percent of the total RHNA.

- HCD’s allocation of 459,917 additional units as an overcrowding adjustment (line 6 of Attachment 2 to HCD’s 9/22/2019 letter) amounts to double-counting households thereby artificially inflating the total RHNA allocation. The number of projected households in 2029 (line 4) represents the total number of housing units needed to accommodate all households in the SCAG region in 2029, not just the additional households created during the eight-year projection period. As such, this projected number of occupied housing units is sufficient to fully address the housing needs of doubled-up households that contribute to overcrowding. Furthermore, some portion of overcrowded units is a function of household size, not households doubling up. The Census definition of overcrowding is more than one person per room. The appropriate solution to households living in units that are considered to be too small according to the Census definition is larger housing unit size, not more total units.
- HCD’s vacancy adjustment of +178,896 units (line 5) is based upon a “healthy vacancy rate” of 5 percent. State law establishes this 5 percent rate only for rental units, and the normal vacancy rate for owner-occupied units is typically much lower than rental units. HCD’s allocation ignores this difference, which results in a substantially higher vacancy adjustment than is reasonable.
- Under SB 375, consistent planning assumptions must be used for transportation and housing planning, and those planning assumptions must be based upon local general plans. Vastly inflated RHNA allocations as compared to the RTP/SCS growth forecast will force local jurisdictions to amend their general plans to designate more land for housing at higher densities, resulting in inconsistencies between local plans and the regional growth forecast, undermining the legislative intent of SB 375.
- In 2011 the State legislature dissolved local redevelopment agencies, resulting in the loss of \$1 billion per year in affordable housing funds. It is well-recognized that lower-income housing requires huge financial subsidies, and insufficient public funds are available to produce the number of affordable housing units needed. While the State

Mr. Kome Ajise, Executive Director

September 4, 2019

Page 3 of 3

has eliminated a significant source of affordable housing funding, other changes to State housing law such as SB 35 penalize local jurisdictions that do not achieve their RHNA housing allocations. HCD's inflated RHNA allocation is strikingly inappropriate at a time when State/local governmental cooperation is most needed to address the "housing crisis."

- With regard to the process for COGs to file an objection to HCD's determination, State law provides that "*The objection shall be based on and substantiate either of the following:*

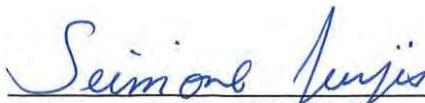

*(A) The department failed to base its determination on the population projection for the region established pursuant to subdivision (a), and shall identify the population projection which the council of governments believes should instead be used for the determination and explain the basis for its rationale.*

*(B) The regional housing need determined by the department is not a reasonable application of the methodology and assumptions determined pursuant to subdivision (b). The objection shall include a proposed alternative determination of its regional housing need based upon the determinations made in subdivision (b), including analysis of why the proposed alternative would be a more reasonable application of the methodology and assumptions determined pursuant to subdivision (b)."*

It is noted that these criteria for objections mention population projections but not existing need. Again, the lack of specific reference by the Legislature to existing need in the objection criteria begs the question of whether a RHNA allocation that is inflated by 580,000 units represents a "reasonable application of the methodology."

The City of Newport Beach appreciates the efforts of SCAG to address local concerns and remains committed to doing its part in addressing the housing crisis in compliance with Housing Element law.

Sincerely,

Seimone Jurjis, PE/CBO  
Community Development Director

Jaime Murillo, Principal Planner  
Marnie Primmer, Orange County Council of Governments Executive Director

At approximately 3.4 square miles -- Solana Beach is the second smallest city in San Diego County. Our **population falls well below** the State's definition of a "small city" **and** our entire city falls within the Coastal Zone.

Solana Beach **already** has the highest population density of all North County Coastal cities.

We are a **built-out --- park-space-deficient** city --- without **any** large tracts of **freely develop-able** land.

Geographically, the next largest North County city is **5.3 times larger than Solana Beach**. However, the draft RHNA allocation for that city is less than 2X the allocation earmarked for Solana Beach.

Let's take a moment to compare the density among North County Coastal Cities if the Draft RHNA Methodology is adopted...

- Carlsbad's would be 100 Units per square mile
- Del Mar 93
- Encinitas 81
- Oceanside 130
- Solana Beach --- 260 units per square mile**

Percentage increase if those units were built today:

- Carlsbad 8.5%
- Del Mar 6.5%
- Encinitas 6%
- Oceanside 8%
- Solana Beach --- 13.5%**

*Solana Beach does care about providing housing but we ask that we be given a realistic, attainable goal*

~~I respectfully ask that the draft RHNA methodology be revisited --- to more fairly and equitably distribute units to meet the objective of allocating housing in an equitable manner...~~

Thank you

*Kristi Becker*  
*Solana Beach*

**Subject:** housing in Coronado

I am from the old school where you live where you can afford. This low income housing has become ridiculous. Why would you think we have room for a 1000 low income housing in Coronado when there is no land. I worked all my life to live in a nice place. Let people earn their way. There is no room here unless you want to take land away from the navy. On the other hand you could condemn a lot of properties and dislocate people who have earned the right to live here. This is happening all over California and should be stopped. It changes the dynamics of neighborhoods, schools, transportation etc.

Frances Carrigan

Goal: 100

#### Objection to Proposed 1000+ Units for Coronado

Dear Honorable Board Members:

The community of Coronado appreciates the opportunity to share our comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. The community recognizes development of the RHNA is a challenging endeavor and we sincerely appreciate the hard work and active engagement of SANDAG staff throughout the process.

We have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

Coronado is constrained unlike any other city in San Diego County.

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified

Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.

- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.
- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG

region while the City of Coronado disproportionately endures its traffic, noise, and other impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.

- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, we respectfully request the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado.

Coronado's "share" of the regional housing need for the period 2010-2020 was allocated at 50 units, which Coronado exceeded by almost 400 units, or around 900%. That SANDAG did not give us a credit for the ~400 units we exceeded for 2010-2020, but instead is proposing to raise our allocated share to 1,000+ units for the 2021-2029 period, is unconscionable, as we have already EXCEEDED CAPACITY in town with respect to traffic, parking, sewer, and density. Bottom line — we will not comply with SANDAG's RHNA process. Let them withhold our share of the state gas tax, which is a negligible pittance.

SANDAG Agenda Item #7 – Comments

Dear Fellow Honorables,

When I stood before you on July 26<sup>th</sup>, I called on you to do more, to fairly and equitably rationalize and allocate Cycle 6 RHNA housing units. At that time, I pointed out flaws in the draft RHNA Methodology...

- That the impact of the recommendations vary inequitably from city-to-city, with small cities by far bearing the brunt of that inequity.
- I shared evidence regarding existing and proposed density, along with the draft allocation numbers that substantiated these flaws.
- I <sup>described</sup> explained how differences in <sup>practical</sup> commute opportunities <sup>fluctuate</sup> vary dramatically from mode-to-mode and questioned how they could possibly be weighted equally.

I urged...

- That the draft RHNA methodology be revisited.
- That allocations to small cities be reevaluated
- And that a truly fair, equitable and efficient process **MUST** include some mechanism to normalize the RHNA allocations to account for meaningful differences from city-to-city, based not only on size and population -- but also on each city's ability to absorb additional housing units.

The approximate RHNA Cycle-6 percentage increase to our region is 6%, yet Solana Beach's increase is 13.5%. Del Mar, Coronado, Imperial Beach, Lemon Grove, National City and my city, Solana Beach are all small cities – and all are burdened unfairly by the flawed Draft RHNA Methodology.

If the Board votes today to approve and submit the Draft RHNA Methodology, you will have failed to satisfy the "Objectives" and "Direction" as shown on slides 4 and 5. Honesty may not win me a popularity contest but my conscience and my constituents require me to fight for what is fair, and to ask **you** to do what is right.

Sincerely,  
**Jewel Edson**  
Deputy Mayor  
City of Solana Beach

**Subject:** Objection to Proposed 1000+ Units for Coronado

## **Objection to Proposed 1000+ Units for Coronado**

SANDAG Board Members:

I appreciate the opportunity to share my comments and concerns with the proposed 2021-2029 Regional Housing Needs Assessment (RHNA) plan. I recognize development of the RHNA is a challenging endeavor and I appreciate the hard work and active engagement of SANDAG staff throughout the process. However, the approach being used with the existing one-size fits all formula is extremely flawed and should not be used in areas that are constrained by numerous external factors. Trying to fit a square peg in a round hole will not work - case in point, Coronado.

I have grave concerns about the plan's disproportionate impact on Coronado. Under the proposed RHNA plan, Coronado would be assigned 1,001 new housing units, up from 50 and 64 units during the prior two housing cycles. While we are committed to doing its fair share to address the region's housing shortage, the proposed 2000% RHNA increase is both unreasonable and impractical for the reasons outlined below.

Coronado is constrained unlike any other city in San Diego County.

- Although the City of Coronado occupies 7.7 square miles of land within its boundaries, approximately 5.5 square miles, or 71% of the City, are owned by the U.S. Navy, the Unified Port District of San Diego, and the California Department of Parks and Recreation, none of which may be used to accommodate future housing. Consequently, the City only has land use authority over a 2.2 square mile area.
- The 2.2 square miles under the City's jurisdiction are densely developed with a high concentration of multi-family housing which provides limited geographic capacity to accommodate significant new growth.
- 95% of the parcels in Coronado are already zoned for residential use and there are very few vacant properties, severely limiting the City's ability to meet the proposed RHNA by rezoning commercial properties or developing vacant land.

- The entire City of Coronado is within the coastal zone. Residential uses are not coastal dependent uses and new high-density, multi-family housing would require Coastal Commission approval and meet attendant off-street parking requirements.
- Coronado is within the Airport Influence Area and Accident Potential Zone of NAS North Island which will prevent any increased density or height.
- Coronado has a high concentration of designated historic homes which cannot reasonably be redeveloped with higher density multi-family units and the loss of historic properties would irreparably damage Coronado's unique community character.
- Coronado's only links to mainland San Diego are via the San Diego-Coronado Bridge and State Route 75 along the Silver Strand. Commuter trips generated by new housing would exacerbate already congested conditions on the Bridge and State Route 75 and there are no practical alternatives to increase traffic capacity.

The inclusion of military jobs in the RHNA formula unreasonably escalates Coronado's housing share.

- Naval Air Station North Island (NASNI) comprises almost 70% of Coronado's total land area, approximately 25% of its population, and 45% of its total jobs. No other city in San Diego County would be as significantly impacted by the presence of a military base in their jurisdiction.
- Active military jobs should not be included in the RHNA formula. Active duty military jobs are unique because military personnel are assigned to a base and have no choice where to live and work. Moreover, local governments have no control over military base population, jobs, or housing provisions.
- While the proposed RHNA formula includes all active military jobs at NASNI, it does not account for housing already provided for the vast majority of service men and women who reside on base, aboard ships, or in federally subsidized military housing in San Diego County. Moreover, it is illogical to include thousands of Navy jobs assigned to aircraft carriers whose sailors must live aboard the ship.
- NASNI provides regional economic benefits which are enjoyed throughout the SANDAG region while the City of Coronado disproportionately endures its traffic, noise, and other

impacts. Providing additional housing for military personnel should be a shared burden between the entire San Diego region and the U.S. Navy, not just the City of Coronado. Coronado's high land values makes it economically challenging to develop high-density affordable housing.

- Like many coastal California cities, Coronado is a highly desirable place to live and consequently has very high land costs which makes it economically challenging to develop high-density affordable housing. While the City of Coronado may ultimately endure a painstaking process to rezone its community to accommodate the desired high density affordable housing, it is unlikely that developers will construct.

For the reasons outlined above, I demand that the SANDAG Board of Directors revise the draft RHNA plan to account for the unique circumstances and challenges in Coronado. Failure to do so equates to a failure of the collective SANDAG board to adequately and fairly do your jobs!!!

Thank you,  
Steve Jackson

**Subject:** RHNA - Public Comment - Concern regarding methodology for Coronado's Allocation

To Seth Litchney and the Board of Directors -

I would like to reiterate my concerns regarding the methodology used to determine Coronado's allocation of increased housing units as it relates to the recommendations of the Regional Housing Needs Assessment Subcommittee. I have already provided detailed comments and questions regarding this issue. Listed below is a summary of those concerns, which I hope the committee is considering in their assessment.

- Impact to the Coronado School District, specifically increase in student body and class size.
  - Where the district is currently one of the lowest funded in the county and has been managing a potential teacher strike
  - Current class sizes are large, upwards of 40 students in some classes
- Impact to the city's parks and green space.
  - The city is already one of the most dense in the area due to the volume of multi-family units.
  - The limited amount of parks and open space (under the City's control) are used by many families and young children who do not have backyards at their homes
  - Residents only have these parks for outdoor space when the beaches are closed due to bacteria levels resulting from the Tijuana River sewage issues
- Impact of including the job pool located on Coronado's Naval base in the calculation but excluding the subsidized housing units provided on the naval base
  - The portion of the land that is owned by the Navy is 2 - 3x larger than the land mass available to the city.
  - The Navy provides housing for many of the personnel who work on the base. These housing units should be included in the calculation for Coronado's assessment
- Impact of changing the assumptions to include the Naval base job pool as solely Coronado's housing responsibility, even though the base has existed prior to WWII
  - Changing the methodology should be grandfathered in over a longer period of time rather than a huge catch up during one assessment period
  - The Naval base is one of the largest in the country and is a source of jobs for the greater San Diego County, not just Coronado
- Impact to traffic with potentially 2000+ more residents entering and exiting the city
  - Only two routes to access the city
  - One of the routes is the deadliest bridge in America resulting from numerous suicides and suicide attempts
    - Caltrans has been slow to address safety and prevention measures
    - Coronado residents are routinely dealing with bridge closures and nightmare traffic from the suicide activity
- Managing the increased housing density with the height restrictions imposed by the Navy
  - Buildings are restricted by the Navy to ensure a safe environment for the community and numerous aircraft, helicopters, fighter jets, massive transport C130s, that take off and land from the base
- Impact to Coronado's first responders, including Sharp hospital, with increased population and lack of space to expand current facilities
- Allocation of building cost to state government, specifically how to incentivize builders to build units given current land and cost to build
  - These housing units have to be subsidized from somewhere. Who will take on this expense?
- Impact to housing density in relation to climate change and rising sea levels

- Flooding is already an issue where the Spanish Bight was filled in the 1940s, which is expected to get worse with rising sea levels

I'm asking the Board to consider these concerns as the methodology is finalized. The allocation of 1,000+ units to Coronado appears extreme given the unique circumstances the city faces. I understand that affordable housing is a huge concern for our state, and I believe Coronado should participate in helping to alleviate the situation. However, I believe the calculation does not consider key factors, and this current assessment is unreasonable. Exemptions were made for counties in Northern California, Marin, Napa/Sonoma, Santa Cruz, and Santa Barbara, due to the unique circumstances in those areas. Please consider the environment in Coronado in your evaluations.

Thank you,

Sara Nese

Good evening,

The agenda for the September 6, 2019, Board of Directors meeting has been posted [online](#). The draft RHNA methodology will be discussed as Item 7. Since the email below (dated August 23, 2019), additional public comments have been received and posted online on the [RHNA webpage](#).

- [View public comments received between August 23, 2019, at 5:01 p.m. and August 28, 2019, at 5 p.m.](#)

Additionally, SANDAG has provided a response to public comments received between July 26 and August 28, 2019.

- [View response to public comments received between July 26 and August 28, 2019, at 5 p.m.](#)

As included in the previous email, the following documents are also available on the [RHNA webpage](#).

- [View requested supplemental information](#)
- [View FAQs](#)
- [View public comments received by August 23, 2019 at 5 p.m.](#)

SANDAG is still taking public comments via email to Seth Litchney at [seth.litchney@sandag.org](mailto:seth.litchney@sandag.org) or via phone at (619) 699-1982. Public comments received at or prior to September 4, 2019, at 5 p.m. will be included in the materials given to the Board of Directors for its September 6, 2019. The public comment period will close on September 6, 2019, when the Board of Directors will hold a public hearing.

Thanks,

Audrey Porcella

**Subject:** RHNA - Additional Information

Good evening,

On July 26, 2019, the Board of Directors released for public comment the [draft RHNA methodology](#), which included a discussion of how the methodology was developed, how the proposed methodology furthers the objectives in state law, and how the RHNA factors in state law were incorporated.

At the July 26 meeting, several Board members requested additional information related to development of the methodology. SANDAG has compiled the requested information in the document linked below for consideration during the public comment period. SANDAG also has prepared a list of Frequently Asked Questions (FAQs), based on questions and comments received so far during the public comment period.

- [View requested supplemental information](#)
- [View FAQs](#)
- [View public comments received by August 23, 2019 at 5 p.m.](#)

SANDAG is still taking public comments via email to Seth Litchney at [seth.litchney@sandag.org](mailto:seth.litchney@sandag.org) or via phone at (619) 699-1982. The public comment period will close on September 6, 2019, when the Board of Directors will hold a public hearing.

For more information on the RHNA process, visit [sandag.org/rhna](http://sandag.org/rhna)
