Dear Secretary Alvarez:

SUBJECT: Annual Report to the Legislature per California Assembly Bill 805

Pursuant to California Public Utilities Code Section 132354.1, the San Diego Association of Governments (SANDAG) respectfully submits the enclosed report outlining the San Diego region's public transit needs, transit funding criteria, recommended transit funding levels, additional work on public transit, and funds spent explicitly on public transportation.

SANDAG invested more than \$3.2 billion in the transit system in FY 2017, including the ongoing construction of the Mid-Coast Trolley extension (the single largest transportation project ever undertaken in the region) and the South Bay *Rapid* route. Funds also were invested in the double-tracking of the Los Angeles – San Diego – San Luis Obispo Rail Corridor coastal rail line, active transportation projects, the rehabilitation of the existing Blue and Orange Trolley lines, and programs to reduce transit fares for seniors.

Going forward, SANDAG will continue to work closely with the Metropolitan Transit System and North County Transit District to expand the region's transit system as well as address challenges such as declining ridership, increasing subsidies, aging vehicle stock, and unfunded state mandates. In particular, we look forward to partnering with the Legislature to identify funding opportunities that reward regions and agencies, such as SANDAG, that are using local funds to help improve the efficiency and effectiveness of their transit systems.

If you have any questions or would like additional information, please contact Robyn Wapner at (619) 699-1994 or robyn.wapner@sandag.org

Sincerely,

KIM KAWADA

Chief Deputy Executive Director

KWA/RWA/nye

Enclosure: FY 2017 Annual Public Transit Report

FY 2017 ANNUAL PUBLIC TRANSIT REPORT

Descriptions of Multimodal Projects/Programs	35
Links to Source Data	37

Executive Summary

During FY 2017, the region realized the benefits of recent major investments made by SANDAG in the transit system, while at the same time moving forward with the construction of additional large-scale transit projects.

These additions to the transit system have been made possible by a massive investment in new projects, rehabilitating existing systems, and supporting the operations of previously existing services. SANDAG invested more than \$3.2 billion in the transit system in FY 2017, including the ongoing construction of the Mid-Coast Trolley extension (the single largest transportation project ever undertaken in the region) and the South Bay *Rapid* route. *TransNet* funding represented 41 percent of the FY 2017 transit capital program budget. Funds also were invested in the double tracking of the LOSSAN coastal rail line, active transportation projects, the

rehabilitation of the existing Blue and Orange Trolley lines, and programs to reduce transit fares for seniors.

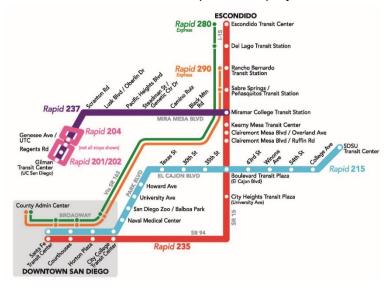

These services, benefits, and construction projects include:

Rapid Network: The ongoing rollout of a new *Rapid* network now provides five new fast, comfortable transit services in the region. Three new routes joined the network in 2015. In 2017, the *Rapid* network served nearly 6.6 million passengers.

Two projects in the existing *Rapid* Network were under construction in FY 2017: A *Rapid* station serving a new major hospital complex and the Centerline Transit Stations, the first freeway level transit stations in the region. In FY 2017, the *Rapid* network served nearly 6.6 million passengers.

South Bay Rapid Bridge Construction over State Route 125

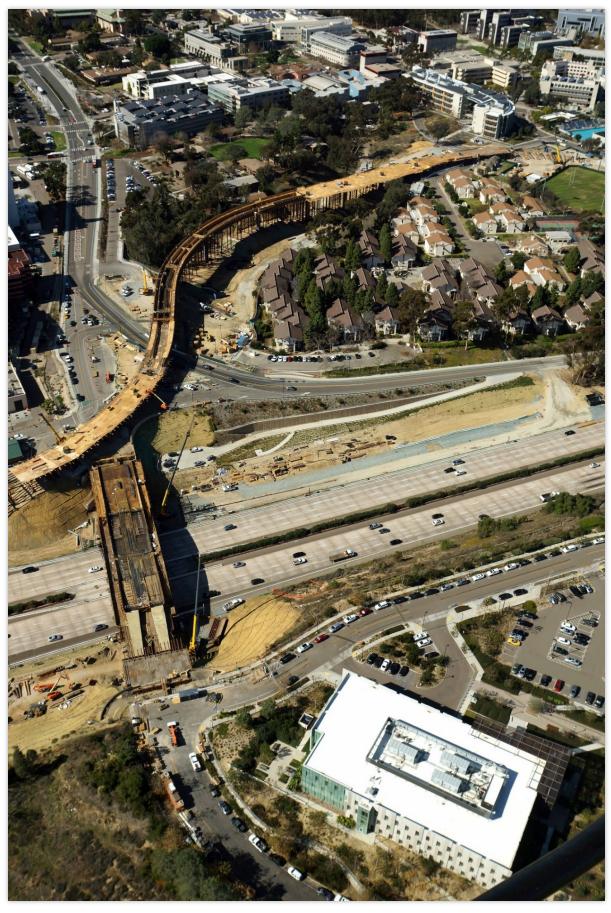

Existing Rapid Network

SANDAG is continuing to expand the *Rapid* network with the ongoing construction of South Bay *Rapid*, a 27-mile route that will provide high quality regional transit connecting the Otay Mesa border crossing and the compact residential communities of eastern Chula Vista with Downtown San Diego. This route is expected to open in early 2019.

Mid-Coast Trolley Extension: SANDAG continued construction of the Mid-Coast Trolley project, an 11-mile extension of the Blue Line. When the extension is complete, the Blue Line will offer a one-seat ride from the international border to University City, one of the densest residential and commercial centers in the region. This new service will enhance direct public access to regional

activity centers, including UC San Diego, and improve travel options to employment, education, medical, and retail centers for corridor residents, commuters, and visitors. The Mid-Coast Trolley project is the single largest transportation infrastructure project ever undertaken in the region. Transportation models indicate that the new trolley service will attract 20,000 transit riders a day to the system when Mid-Coast opens in late 2021.

Construction of the Mid-Coast project on UC San Diego West Campus

Trolley Renewal: SANDAG and the Metropolitan Transit System (MTS) completed the Blue Line Trolley Renewal project, a large investment to upgrade 17 miles of existing Trolley lines, providing for new low-floor trolley cars, upgraded infrastructure, and refreshed passenger facilities.

Coastal Rail Line Double Tracking:

SANDAG continued to make progress on double tracking the entire 60-mile San Diego segment of the Los Angeles-San Diego-San Luis Obispo (LOSSAN) rail corridor. The San Diego LOSSAN segment passes over six coastal lagoons, as well as through Camp Pendleton, and the

Double Track Project over Batiquitos Lagoon

cities of Oceanside, Carlsbad, Encinitas, Solana Beach, and Del Mar before terminating in Downtown San Diego. Approximately 50 trains operate each weekday on the segment south of Oceanside. Work continued on the San Diego River Bridge Double Track, Elvira to Morena Double Track, Los Peñasquitos Lagoon Bridge Replacement, Chesterfield Drive Crossing Improvements, San Elijo Lagoon Double Track, and Oceanside Station Pass-Through Track projects. In addition, environmental and design work continued on several other LOSSAN corridor projects.

Oceanside **Transit** Center: Work was completed on upgrades to the Oceanside Transit Center, a key connection point serving intercity and commuter rail services and local bus service. The Oceanside Transit Center serves more than one million transit passengers each year.

Oceanside Transit Center Construction

Bikeways: SANDAG continued to move forward with the implementation of the \$200 million Regional Bike Plan Early Action Program, which will helps provide active transportation connections, including to transit facilities. Three new miles of bikeway were opened, and progress was made on the planning, design, and construction of numerous additional projects.

State Route 15 Bikeway Ribbon Cutting

Station Upgrades: In addition to major projects, more than 80 transit stations and stops were upgraded and/or completed by the end of FY 2017.

Specialized Transportation Grant Programs: There are many seniors and individuals with disabilities for which existing transit and paratransit is not appropriate; they need a more specialized service. Examples of specialized transportation services include programs in which trained drivers and volunteers help seniors in and out of vehicles, transport individuals with developmental disabilities from group homes to job sites around the region, and provide shuttles to grocery shopping or community events. These services allow seniors to age in place, stave off isolation, and maintain their quality of life. The SANDAG Specialized Transportation Grant Program (STGP) funds projects and programs that expand mobility options for seniors and individuals with disabilities. Since the program began in 2006, SANDAG has awarded more than \$24 million in federal grant funds (including funds from former federal grant programs) and \$14.6 million in *TransNet* funds through nine competitive grant cycles. This funding has supported a total of 190 specialized transportation projects.

While substantial progress was made to expand the region's transit system in FY 2017, there continue to be challenges to the implementation of public transit projects. These include declining ridership, increasing subsidies, and aging vehicle stock. Going forward, SANDAG is working closely with the Metropolitan Transit System (MTS) and North County Transit District (NCTD) to mitigate these trends. MTS is in the process of implementing a Transit Optimization Plan, with initial service changes taking place this past January 2018, and further service changes scheduled to take place in June and September. NCTD also implemented significant service changes in October 2017 to increase productivity. Both agencies are looking to increase ridership and revenue by updating the regional fare ordinance and reinvesting resources from underutilized services into more productive areas and routes with high demand. Many of these challenges are being experienced by Transit agencies throughout the State. Therefore, SANDAG, together with our Transit Agencies, look to the State of California to become a partner in addressing these challenges by recognizing and supporting those that are taking affirmative steps to improve the efficiency and effectiveness of their transit systems. This support could take the form of increased formula funds and/or funding opportunities that reward regions and agencies that are implementing these kinds of proactive efficiency measures.

Background and Purpose

SANDAG serves as the Metropolitan Planning Organization for the San Diego region and receives federal, state, and local funding that is used to support capital projects and operations. SANDAG primarily is responsible for planning, engineering, and constructing transportation projects. Once SANDAG completes a transit project, it is turned over to the appropriate transit agency to operate and maintain.

MTS is responsible for service planning, scheduling, and performance monitoring of transit operations in the cities of Chula Vista, Coronado, El Cajon, Imperial Beach, La Mesa, Lemon Grove, National City, Poway, San Diego, Santee as well as the portions of the County of San Diego.

NCTD is responsible for service planning, scheduling, and performance monitoring of transit operations in Northern San Diego County and is represented by Carlsbad, Del Mar, Encinitas, Escondido, Oceanside, San Marcos, Solana Beach, and Vista as well as portions of the County of San Diego.

Passed in 2017, Assembly Bill 805 (AB 805) (Gonzalez Fletcher) amended state law to require that the SANDAG Board of Directors provide a report, developed by the agency's Transportation Committee, to the Legislature on or before July 1 of each year. This report must cover a variety of issues related to transit, including public transit needs, transit funding criteria, recommended transit funding levels, and additional work on public transit. The report also must specify the funds spent explicitly on public transportation.

Below is a summary of the report's five primary elements:

- Public Transit Needs Public transit needs have been identified as those projects listed in San Diego
 Forward: The Regional Plan, transit service area needs identified in the Coordinated Plan, and projects
 identified by the region's transit operators in their annual budgets. The Regional Plan is updated every four
 years. Project costs listed in the current Regional Plan projects reflect 2014 dollars.
- Transit Funding Criteria Transit funding criteria is developed every four years as part of the Regional Plan.
 These criteria are developed in conjunction with the SANDAG Board of Directors, community groups, and public outreach.
- Additional Work on Public Transit This section of the report includes a compilation of activities that help to implement public transit. Data in this section consists of Fiscal Year 2017 expenditures.

- Recommended Transit Funding Levels Every year, SANDAG adopts a Regional Transportation Improvement Program (RTIP). The RTIP, which covers five fiscal years, incrementally implements the Regional Plan. All projects that are programmed to receive funding must be identified in the RTIP. The funding levels included in the RTIP are in year of expenditure dollars.
- Funds Spent Explicitly on Public Transit SANDAG and the transit agencies' budgets have been utilized to identify the specific amounts spent for transit (capital, operations, and maintenance) in the 2017 fiscal year.

Public Transit Needs

A comprehensive list of transit projects identified by SANDAG and the region's transit operators that would meet the transit needs of the San Diego region is included in San Diego Forward: The Regional Plan (Regional Plan). The Regional Plan is a federally and state-mandated document that presents the overall vision for how the San Diego region will grow through 2050, including all the transportation-related investments that will be needed to support that vision.

The Regional Plan's Unconstrained Transportation Network includes all transportation projects necessary to serve the mobility needs of the region through 2050, requiring funding above and beyond the revenues expected to be available. There are 75 transit projects in the Unconstrained Transportation Network. These projects are shown in Attachment 1 of this report. Highlights from this list include:

- Construction of The Purple Line this is a proposed light rail line that would operate between San Ysidro and Kearny Mesa along I-805. Unlike the existing Blue Line Trolley, this project would bypass Downtown San Diego and provide riders with a more direct trip to job centers in Mission Valley and Kearny Mesa.
- Upgrading the Mid-City Rapid service to a light rail line
- Extension of the Mid-Coast Trolley line to Sorrento Valley
- Double tracking of the SPRINTER line
- Frequency enhancements for the COASTER; Blue and Orange Trolley Lines; and SPRINTER

San Diego Forward: The Regional Plan also includes several transit facility improvements. These include the San Ysidro Intermodal Transit Center, ramp connections to the San Diego International Airport, and vehicles and maintenance facility improvements.

There are 62 active transportation projects included in San Diego Forward: The Regional Plan that will serve public transit stations or stops. These projects act as first mile/last mile connectors or include pedestrian enhancements that facilitate better access to public transit.

Highlights of these projects include:

- Coastal Rail Trail direct connections to COASTER routes
- Inland Rail Trail connections to SPRINTER routes
- Uptown Bike Lane connections to local bus routes
- Bayshore Bikeway connections to the San Diego Trolley
- I-15 Bikeway connections to Centerline/Rapid/local bus services

Coordinated Plan

In addition to the Regional Plan, SANDAG completes the Coordinated Plan every two years. The Coordinated Plan is a five-year blueprint for implementing public transit and social service transportation projects and services described in the Regional Plan. In particular, the Coordinated Plan provides a regional strategy for providing transportation to some of the region's most sensitive populations, including seniors and individuals with disabilities. As part of the Coordinated Plan, the transit operators identify transit service area needs and address them as part of their ongoing planning efforts. The FY 2017 projects are identified below.

	Route	Day	Description	Urban Zone			
MTS Identii	MTS Identified Service Area Needs						
	11	Weekday	Adjust schedule to improve on-time performance	Yes			
	25	Weekday	Adjust schedule to improve on-time performance	Yes			
FY 2017	815	Weekday	Adjust schedule to improve on-time performance	Yes			
FY 2017	874/875	Weekday	Adjust schedule to improve on-time performance	Yes			
	901	Weekday	Adjust schedule to improve on-time performance				
	962	Weekday	Adjust schedule to improve on-time performance	Yes			
NCTD Ident	tified Service A	rea Needs					
EV 2047	New Route	Weekday	New BREEZE route connecting Carlsbad Poinsettia COASTER Station and San Marcos Civic Center via Alga Road and San Elijo Hills	Yes			
FY 2017	New Route	Weekday	New peak period SVCC shuttle connecting Sorrento Valley COASTER Station to Del Mar Heights via El Camino Real	Yes			

Transit Funding Criteria

SANDAG prioritizes project funding through the development of performance measures and criteria as part of the Regional Plan. Input for the criteria are received through public workshops, as well as from the region's planning directors, the transit operators, SANDAG policy committees, and the Board of Directors.

The project evaluation criteria for San Diego Forward: The Regional Plan are organized within the three goals established by the SANDAG Board: (1) Innovative Mobility and Planning, (2) Healthy Environment and Communities, and (3) Vibrant Economy. Each individual criterion is nested into one of the three goals.

Project Evaluation Criteria Transit Services

No.	Criteria	Description	Proposed Calculation	Max Score	Total %	Policy Objectives			
Innov	Innovative Mobility & Planning								
1	Provides Time Competit ive/ Reliable Transit Service	What is the percentage of the route located in priority treatment?	Analysis of percentage of transit route within dedicated transit guideway; dedicated arterial lane, interrupted rail, or Managed Lane; or HOV lane or arterial spot treatment	10	35	Mobility Choices, Complete Communities			
2	Serves Daily Trips	What is the number of additional daily transit trips resulting from the project?	Change in daily transit linked trips	15		Mobility Choices, Complete Communities			
3	Provides Access to Evacuati on Routes	How will the project provide evacuation access for regional hazards?	Proximity analysis of hazard areas (dam failure, earthquake, flood, landslide, liquefaction, tsunami, and wildfire), weighted by population and employment	5		Mobility Choices, Partnerships and Collaboration, Binational Collaboration with Baja California, Preservation and Safety of the Transportation System			
4	Daily System Utilizatio n	What is the daily transit utilization?	Daily passenger miles/ daily service seat miles (system wide)	5		Mobility Choices, Complete Communities			
Healt	thy Environn	nent & Communities							
5	Greenho use Gas and Pollutant Emissions	A) What is the reduction in CO ₂ emissions from implementing the project?	Reduction in CO ₂ emissions	5	30	Environmental Stewardship, Energy and Climate Change Mitigation and Adaptation			
		B) What is the reduction in smog forming pollutants from implementing the project?	Reduction in smog forming pollutants	5					

No.	Criteria	Description	Proposed Calculation	Max Score	Total %	Policy Objectives
6	Serves RCP Smart Growth Areas	What is the share of trips on the transit service serving RCP Smart Growth areas?	Share of trips on transit service serving all existing/planned or potential Smart Growth Areas is calculated, using select link analysis	10		Complete Communities, Regional Economic Prosperity, Habitat and Open Space Preservation
7	Physical Activity	What is the increase in physical activity?	Increase in time engaged in moderate transportation-related physical activity	10		Mobility Choices, Complete Communities
Vibra	nt Economy	,				
8	Accessibil ity	A) What is the increase in job and school trips by transit?	Change in daily transit linked work and school trips	4	35	Mobility Choices, Regional Economic Prosperity
		B) How will the project support access to recreational areas and beaches?	Acres of parkland/ recreational areas and beaches within 1/4 mile of project	3		Complete Communities, Habitat and Open Space Preservation
		C) What is the increase in transit trips by disadvantaged communities?	Change in total transit trips by disadvantaged community's population	3		Mobility Choices, Partnerships and Collaboration
		D) How will the project facilitate pedestrian and bike access?	Project located within 1/4 mile of pedestrian and bike facilities	3		Mobility Choices, Complete Communities
		E) What is the increase in transit trips to federally recognized Indian reservations?	Change in total transit trips to/from Indian reservations	2		Mobility Choices, Partnerships and Collaboration
9	Project Cost- Effective ness	What is the cost- effectiveness of the project?	Enhanced cost- effectiveness measure incorporates the following components: - Project cost - Fuel costs - Greenhouse gas emissions - Smog forming pollutants - Physical activity - Safety	20		Mobility Choices, Regional Economic Prosperity, Binational Collaboration with Baja California, Preservation and Safety of the Transportation System, Environmental Stewardship, Energy and Climate Change Mitigation and Adaptation

In addition to the funding criteria outlined above, SANDAG works closely with the region's transit operators to address their funding priorities. SANDAG currently has 32 primary or alternate Board members who serve as a primary or alternate member on the MTS and/or NCTD boards. The transit agencies have direct involvement in the Regional Plan and serve as stakeholders in the development of the overall criteria.

In FY 2017, MTS had several major initiatives that drove the organization's funding allocation. These projects included:

- Transit Optimization Plan (TOP) The project is a comprehensive evaluation, including extensive customer
 outreach effort to ensure that MTS services are efficient and effective for the region's travel needs. TOP
 is an update of the 2004-2006 Comprehensive Operation Analysis (COA) that resulted in major changes
 to the system's bus and Trolley services.. https://www.sdmts.com/inside-mts-current-projects/transitoptimization-plan
- Fare collection upgrade/Compass cloud-based services
- Passenger upgrades/facility enhancements Trolley arrival information, upgrading bus benches and shelters
- Mid-Coast Trolley Extension construction
- Rehabilitation of the Blue Line Trolley

NCTD's FY 2017 funding priorities included:

- Positive train control Positive Train Control is an integrated command, control, communications and information system that controls train movements, thus promoting safety of all who use rails. http://www.gonctd.com/positive-train-control-about/
- Safety upgrades ongoing upgrades to rails, support systems, and maintenance facilities.
- Municipal separate storm sewer systems (MS4s) requirements.

Additional Work on Public Transit

Studies

In addition to the regular work that SANDAG undertakes as part of its core mission to develop transportation programs and projects, there are a variety of additional studies that are undertaken at the direction of the SANDAG Board of Directors. These studies fall into two main categories:

- Transit focused studies these studies are directly related to the provision of public transit
- Multimodal studies/transit supportive studies these studies include a transit component.

Sixteen transit focused studies were undertaken and/or completed in 2017. Forty-nine multimodal studies also were underway in 2017. A list of the projects and general description is included in Attachment 4. There are two separate lists in this attachment – the first list includes the projects and expenditures and the second list provides a broad overview of how the multimodal projects relate to public transit.

The studies that are identified in this section serve as the building blocks for future capital projects, provide data that is utilized to ensure efficient operation or improvements in existing transit service, or develop the projects that are outlined in the Regional Plan. Some highlights in this list are advanced planning studies that are used to advance conceptual planning on projects like The Purple Line, Mobility Hubs analysis for Mid-Coast that assesses the Mid-Coast stations that would best serve as mobility hubs, and tribal planning which provides funding for our cooperative planning efforts with the region's tribal governments.

These studies also help to address some of the challenges faced in the region. Aging vehicle stock and declining ridership tend to be ongoing challenges and SANDAG is constantly evaluating ways to tackle them.

Vehicle Replacement

The region's transit operators have ongoing vehicle replacement needs that are funded through their capital programs. As the system ages, these needs become more acute and expensive. An example of this is NCTD COASTER locomotive needs. NCTD operates COASTER service using seven locomotives. Five of the seven COASTER locomotives are 24 years old and nearing the end of their useful lives. It is anticipated that the full replacement cost of these locomotives will be more than \$50 million. MTS is coping with a similar situation, having to replace trolley cars to accommodate changing technology and system expansion. Both transit agencies continue to seek grant funding to help fund vehicle replacement. SANDAG also has partnered with MTS and NCTD to support these efforts through discretionary programs.

Ridership Improvements

Over the last two years, transit ridership has declined in the San Diego region. An improved economy, lower gas prices, and shifting commute preferences to transportation network companies (e.g. Uber/Lyft) appear to be the primary reasons for this reduction. MTS and NCTD have both identified strategies to turn this trend around. MTS initiated their Transit Optimization Plan (TOP) which identified opportunities to increase service on high ridership routes. NCTD initiated a study to further refine the agency's network with the intent to increase ridership. Advanced planning studies undertaken also evaluate future technologies that could help to address this issue.

Recommended Transit Funding Levels

SANDAG, as the region's Metropolitan Planning Organization and Regional Transportation Planning Agency, is required by state and federal laws to develop and adopt a Regional Transportation Improvement Program (RTIP). The SANDAG RTIP is a multi-billion-dollar, multi-year program of proposed projects for major transportation improvements in the region. Transportation projects funded with federal and state dollars, as well as SANDAG's transportation sales tax program (*TransNet*), must be included in an approved RTIP. The programming of locally funded projects also may be included at the discretion of the agency.

All public transit funding that is recommended for expenditure in the five-year period covered by the RTIP is approved by the SANDAG Board of Directors. The RTIP table below covers the programmed funding levels for transit-related projects from FY 2016 through FY 2021. More than \$10.3 billion is identified to fund transit and multi-modal projects during this timeframe.

FY 2016 - FY 2021 Regional Transportation Improvement Program							
Major Transit							
DESCRIPTION	FEDERAL	STATE	TransNet	LOCAL/PRIVATE	TOTAL (TIP YEARS)

^{**}TDM projects support the provision of first mile/last mile services and do outreach activities that support public transit.

Funds Spent Specifically on Public Transit

The San Diego region invested more than \$882 million on public transit in FY 2017. The projects that represent the biggest expenditures from the SANDAG budget are the Mid-Coast Trolley, Blue and Orange Line Rehabilitation Projects, and double tracking of the COASTER corridor. The largest expenditures made by MTS and NCTD were on the operation of transit services, vehicle replacements, and facility improvements. Attachment 3 lists the SANDAG projects that are included in the budgets listed above and provides links to the transit operators' audit reports.

SANDAG – Transit Projects	\$443,593,822
SANDAG – Multi-Modal Projects	\$64,830,405
MTS	\$273,183,961
NCTD	\$100,408,037
Total Funds Spent	\$882,061,225

Expenditures on transit were made in a variety of ways. SANDAG's Active Transportation program is a multimodal set of projects that benefits transit through the provision of complete streets and enhanced pedestrian infrastructure that provide safer access to transit. SANDAG's discretionary grant programs benefit transit by providing grants to jurisdictions to fund infrastructure investments, bike parking, and educational programs in smart growth communities that have existing transit services; ongoing partnerships with the region's transit operators allows SANDAG to maximize grant opportunities and leverage resources.

Paying for transit services is one of the primary challenges to maintaining and growing the network. *TransNet* currently makes up a sizeable percentage of the capital and operating funds that SANDAG spends on public transit; however, additional revenues are needed to continue to meet the transit needs of the region. For example, the *TransNet* sales tax measure that was passed in 2004 required that Senior/Disabled passes be sold at a 75 percent discount off the adult fare. The subsidy required to maintain that discount averages 24 percent of all fare revenue annually. A recent audit of the *TransNet* Program recommended raising the age to qualify for the senior fare to 65 (up from 60) and decreasing the discount to 66 percent, similar to other regions. This change currently is under analysis and is expected to be reviewed by the SANDAG Board of Directors in 2018.

SANDAG and the region's operators have addressed funding challenges by aggressively pursuing grant funding from programs such as Senate Bill 1 programs, the Transit and Intercity Rail Capital Program (TIRCP), Transportation Investment Generating Economic Recovery (TIGER), Affordable Housing and Sustainable Communities Program, and Active Transportation Program. The region generally has been successful in competing for grant funding. The recent passage of AB 805 also created new funding opportunities for the region by authorizing MTS and NCTD to individually seek specified transactions and use taxes within their respective portions of the County of San Diego to be used for public transit purposes, as specified, serving their jurisdictions.

SANDAG will continue to partner with the transit operators and other stakeholders to secure the funding needed to meet the transit priories in the region.

Attachment 1 – Revenue Constrained and Unconstrained Projects from San Diego Forward: The Regional Plan

		Constrained		Unconstraine	ed
Service	Route	Description	Cost (\$2014) millions	Description	Cost (\$2014) millions
HSR	598			Commuter Rail Overlay (Temecula to Airport ITC)	\$ 340
HSR	1			Extension from Airport ITC to San Ysidro/Otay Mesa	\$ 2,734
COASTER	398	Double tracking (includes grade separations at Leucadia Blvd and two other locations, stations/platforms at Convention Center/Gaslamp Quarter and Del Mar Fairgrounds, Del Mar Tunnel, and extensions to the Convention Center/Gaslamp Quarter and Camp Pendleton)	\$ 2,710	UTC Tunnel	\$ 3,076
COASTER	398			COASTER extension to National City	\$ 900
SPRINTER	399	SPRINTER efficiency improvements; double tracking Oceanside to Escondido, includes six rail grade separations at El Camino Real, Melrose Drive, Vista Village Drive/ Main Street, North Drive, Civic Center, Auto Parkway and Mission Avenue and a Branch Extension to Westfield North County	\$ 1,122		
SPRINTER	399	SPRINTER Express	\$ 244

Attachment 3 - List of Studies and Expenditures

Transit Focused Studies	FY 2017 Expenditures
San Diego International Airport Intermodal Transportation Center	\$80,877.55
Chula Vista Light Rail Trolley Improvement Study	\$18,381.07
Centralized Trolley Control Maintenance	\$485,312.01
Short-Range Transit Service Activities	\$621,966.38
Jobs Access and Reverse Commute/New Freedom Programs	\$161,656.63
Passenger Counting Program (PCP)	\$428,811.21
New Freedom Pass-Through	\$75,175.23
2050 RTP Transit Plan - Advance Studies	\$194,904.78
Veterans Transportation (2)	\$1,487,037.49
Veterans Transportation (3)	\$21,842.58
Regional Transit Signal Priority Study	\$79,591.07
NEW - Enhanced Mobility for Seniors and Disabled Pass Through	\$764,498.36
NEW - Flexible Transportation for Seniors and Disabled	\$816.97
NEW - Mid-Coast Corridor Mobility Hub Implementation Strategy	\$257,049.81
LOSSAN Rail Corridor Planning	\$369,888.71
High-Speed Rail Corridor Planning	\$18,489.51
Transportation Studies	\$1,543,370.61
Regional Transportation Planning and Implementation	\$865,213.05
San Diego Forward Reg Plan	\$675,318.85
Regional Quality of Life Funding Strategies	\$987,808.15
TransNet Smart Growth Incentive Program	\$340,782.12
Transit-Oriented and Joint Development Strategies	\$20,185.97
Transportation Demand Management (TDM) Program	\$386,177.36
TDM Planning Studies/Pilot Projects	\$226,377.87
TDM Employer Program	\$906,564.75
TDM - North Coast Corridor	\$426,093.23
TDM Outreach Program	\$762,410.14
Intelligent Transportation Systems (ITS) Operation	\$778,232.65
Regional ITS Program Management	\$321,365.17
State of the Commute	\$97,469.18
Connected Vehicle Development Program	\$171,781.76
Sub regional Transportation and Land Use Planning	\$76,396.07

^{*} Military Multimodal Access Strategy added at the end of FY 2017, very limited funding spent.

Descriptions of Multimodal Projects/Programs

Multimodal/Transit Supportive Studies*	Description	
Transportation Studies	Planning studies to support implementation of the Regional Plan	
Regional Transportation Planning and Implementation	Planning studies to implement the Regional Plan.	
San Diego Forward Reg Plan	Regional Plan Development	
Regional Quality of Life Funding Strategies	Develop and implement a funding measure to meet regional needs to implement the Regional Plan.	
TransNet Smart Growth Incentive Program	Administer and implement the Smart Growth Incentive Program to increase transit usage.	
Transit-Oriented and Joint Development Strategies	Implement the Regional Plan Transit Oriented Development Strategy	
Transportation Demand Management (TDM) Program	I Commute management. Implementing, monitoring, and measuring the TDM program goals in the Regional Plan.	
TDM Planning Studies/Pilot Projects	Planning for the expansion of shared mobility services in the region and supporting local jurisdictions with TDM planning.	
TDM Employer Program	Ongoing support to continue to grow employer and employee participation in I Commute programs.	
TDM - North Coast Corridor	Support continued coordination of TDM and construction outreach to support the Golden Triangle during Mid-Coast Corridor Transit construction and I-5/Genesee Interchange	
TDM Outreach Program	Engage employers, school and public agencies in program that promote transportation/transit alternatives.	
Intelligent Transportation Systems (ITS) Operation	Develop an integrated Activity Based model (ABM) component to measure and calculate the multimodal regional, corridor and project specific benefits of ITS and TSM strategy.	
Regional ITS Program Management	Update regional ITS strategic plan which establishes an on-call contracts for ITC operation and key technology projects.	
State of the Commute	Annual report tracking the state of transportation including transit.	
Connected Vehicle Development Program	Establish a connected vehicle and deployment plan for the San Diego region. Emerging technology is identified that could assist future transit applications.	
Sub regional Transportation and Land Use Planning	Linking transit and land use in subregional areas.	
Intergovernmental Review (IGR)	Review transit components of sub regional plans.	
NEW - Regional Mobility Hub Implementation Plan	Maximize the options for first and last mile services from major employers and transportation hubs	

Multimodal/Transit Supportive Studies*	Description
TDM and Transportation Systems Management Toolbox	A tool for jurisdictions to use to create TDM supportive systems. (Park and Ride, Mobility Hubs, Carpooling).
NEW - San Diego Regional Military Multimodal Access Strategy	New project that advances multimodal services to military installations
Interregional Planning: Binational Planning and Coordination	Coordinate efforts with SCAG, OCTA, ICTC on planning efforts that include regional transit.
Interregional Planning: Tribal Liaison Program	Coordinate and consult with tribal governments on major transportation and regional planning
NEW - Intraregional Tribal Transportation Strategy	Working with the tribes identify to develop a multimodal strategy
NEW - SANDAG Environmental Justice Analysis	Environmental justice evaluates social equity compliance.
Inter-Regional Park and Ride Strategy	Study to evaluate parking strategies that include transit centers
Government Relations	Support for transit legislation
NEW - Social Equity Best Practices and Modeling Tool	Social equity analysis for plans, policies and actions.
Active Transportation Programs Management	Oversee the implementation of Active Transportation projects. 90% of these projects provide first/last mile transit access.
Regional Bike Plan-Data, Model	Regional bike plans act as first mile/last mile feeders to transit. Transit is modeled as an important element in the bike plans
Regional Bike Plan-Bicycle Park	Planning for bike parks near transit facilities.
Santa Fe Street Building Management	Mid-Coast Trolley property acquisition and management
NEW - TSM - Integrated Corridor Management Programs	Implement the Transportation System Management projects included in San Diego Forward. Focus is on the develop of Concept of Operations for major transit corridors.
