

TECHNICAL APPENDIX 6 INTELLIGENT TRANSPORTATION SYSTEMS (ITS) STRATEGIC PLAN

The San Diego Association of Governments (SANDAG) Intelligent Transportation System (ITS) Strategic Plan identifies the future needs of the region's transportation system users and local agencies and recommends the appropriate strategies and systems to serve those needs through better management and integration of the regional transportation system. The potential technologies and integration plans are described in the San Diego Regional ITS Architecture as part of the overall ITS Strategic Plan.

A new 2007 ITS Strategic Plan is being developed and is expected to be completed in January 2008. It will be included as an addendum to the 2030 San Diego Regional Transportation Plan: Pathways for the Future technical appendices.
