PUBLIC SAFETY COMMITTEE AGENDA

Friday, September 16, 2005
1 to 3 p.m.
SANDAG Board Room
401 B Street, 7th Floor
San Diego

AGENDA HIGHLIGHTS

• FY 2006 PRIORITY ARJIS PROJECTS
• 2004 DRUG USE STATISTICS FOR ARRESTEES
• CRIME MAPPING PROJECT

PLEASE TURN OFF CELL PHONES DURING THE MEETING

YOU CAN LISTEN TO THE PUBLIC SAFETY COMMITTEE MEETING BY VISITING OUR WEB SITE AT WWW.SANDAG.ORG
Welcome to SANDAG. Members of the public may speak to the Public Safety Committee on any item at the time the Committee is considering the item. Please complete a Speaker’s Slip, which is located in the rear of the room, and then present the slip to Committee staff. Also, members of the public are invited to address the Committee on any issue under the agenda item entitled Public Comments/Communications/Member Comments. Speakers are limited to three minutes. The Public Safety Committee may take action on any item appearing on the agenda.

This agenda and related staff reports can be accessed at www.sandag.org under meetings on SANDAG’s Web site. Public comments regarding the agenda can be forwarded to SANDAG via the e-mail comment form also available on the Web site. E-mail comments should be received no later than noon, two working days prior to the Public Safety Committee meeting.

In compliance with the Americans with Disabilities Act (ADA), SANDAG will accommodate persons who require assistance in order to participate in SANDAG meetings. If such assistance is required, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting. To request this document or related reports in an alternative format, please call (619) 699-1900, (619) 699-1904 (TTY), or fax (619) 699-1905.

SANDAG offices are accessible by public transit. Phone 1-800-COMMUTE or see www.sdcommute.com for route information.
PUBLIC SAFETY COMMITTEE  
Friday, September 16, 2005, 1:00 – 3:00 p.m.

Members of the public will have the opportunity to address the Public Safety Committee on any issue within the jurisdiction of the Committee. Speakers are limited to three minutes each and shall reserve time by completing a “Request to Speak” form and giving it to the Clerk prior to speaking. Committee members also may provide information and announcements under this agenda item.

CONSENT

4. HOMELAND SECURITY GRANT APPLICATION (Pam Scanlon)  
INFORMATION

The San Diego Regional Homeland Security Technology Partnership is funded for $3 million via the FY 2005 UASI (Urban Area Security Initiative) grant. ARJIS was invited by the Regional Homeland Security Office to submit a proposal geared toward homeland security prevention using technology to improve collaboration and interoperability throughout the region. The grant proposal for $500,000 is targeting homeland security prevention through the regional deployment of hand-held devices across multi-discipline public safety agencies. The hand-held devices will access multiple information sharing applications in the field, focused on preventing criminal activities and supporting homeland security strategies throughout the region.

+5. INTEROPERABILITY AND COMMUNICATIONS WORKSHOP UPDATE (Chief Zoll)  
INFORMATION

At its July 15, 2005 meeting, the Public Safety Committee approved the proposed interoperability and communications work program and directed staff to plan the workshops, finalize the project cost estimate, and identify funding options for carrying out the work program. An update of recent activities and achievements related to these planning activities is presented, along with a revised timeline for project milestones.
6. REPORT FROM CHIEFS'/SHERIFF'S MANAGEMENT COMMITTEE  
(Chief Zoll)

Chief Zoll will report on the September 7, 2005, meeting of the Chiefs'/Sheriff's Management Committee.

7. FY 2006 PRIORITY ARJIS PROJECTS (Pam Scanlon)

The approved SANDAG FY 2006 Overall Work Program (OWP) and Budget includes $1.23 million for ARJIS application development and system enhancements. After final budget approval, the ARJIS Business and Technical Committees identified priority initiatives to be completed during the fiscal year, utilizing the budgeted development and enhancement funds. The Chiefs'/Sheriff's Management Committee is recommending the Public Safety Committee approve the attached list of projects, prioritized at their September 7, 2005, meeting.

8. 2004 DRUG USE STATISTICS FOR ADULT AND JUVENILE ARRESTEES  
(Cynthia Burke)

In 2004, interviews were conducted with local adult and juvenile arrestees as part of an ongoing data collection effort called Substance Abuse Monitoring (SAM). Updated statistics and trend data detailing drug use histories, urinalysis results, and self-reported risk behaviors were recently released to local policy makers, as well as professionals from prevention, treatment, and law enforcement. This presentation will highlight key findings and outline possible implications for the region as we work together to combat substance abuse in our communities.

9. CRIME MAPPING PROJECT  
(Pam Scanlon and Julie Wartell (District Attorney's Office))

A deliverable in the SANDAG FY 2006 Overall Work Program (OWP) is the development of a new ARJIS crime mapping application available to both the public and law enforcement. The application will replace the existing crime mapping application available on the ARJIS Web site and provide enhanced search capabilities and access to additional data sources. It will also expand the e-mail-based crime map notification service (eWatch) regionwide. eWatch is currently only available to City of San Diego residents. Staff will provide a status of the project and a high-level overview of the application.
10. **UPCOMING MEETINGS**

   The next meeting of the Public Safety Committee is scheduled on October 21, 2005 at 1:00 p.m.

11. **ADJOURNMENT**

    + next to an agenda item indicates an attachment
ROLL CALL

The meeting was called to order by Chair Steve Padilla (South County) at 1:10 p.m. Members introduced themselves around the table. See Attachment 1 for attendance.

APPROVAL OF JUNE 10, 2005 MINUTES

Upon a motion by Councilmember Anthony Young (City of San Diego) and a second by Pam Slater-Price (County of San Diego), the Public Safety Committee unanimously approved the Public Safety Committee minutes of June 10, 2005.

PUBLIC COMMENTS/COMMUNICATIONS/MEMBER COMMENTS

Steve Sawyer and Michael Tyworth from Pennsylvania State University are visiting ARJIS today and attending the Public Safety Committee as observers. They have a grant from the National Science Foundation to study integrated criminal justice. They have identified ARJIS as one of the leading places in the United States for integrated criminal justice and are doing a case study.

CONSENT ITEMS (4 AND 5)

FINAL REPORT ON THE REGIONAL PUBLIC SAFETY NEEDS ASSESSMENT  APPROVE
(Ted Middleton)

The Public Safety Committee was asked to receive and approve the final report on the Regional Public Safety Needs Assessment.

AMEND THE FY 2006 OVERALL WORK PROGRAM AND BUDGET  APPROVE
(Pam Scanlon)

The Public Safety Committee was asked to approve an amendment to the FY 2006 Overall Work Program and Budget to accept $375,000 in grant funding to develop a justice
information sharing prototype demonstrating interstate connectivity and data sharing between multijurisdictional justice information systems.

Action: Upon a motion by Chairwoman Slater-Price and a second by Councilmember Young, the Public Safety Committee unanimously approved Consent Items Nos. 4 and 5.

REPORTS

6. REPORT FROM CHIEFS/SHERIFF’S MANAGEMENT COMMITTEE (Chief Zoll) INFORMATION

Chief Tom Zoll (County Chiefs’/Sheriff’s Association) stated the Management Committee met on July 6, 2005. The Federal Bureau of Investigation (FBI) gave a presentation on its new website, SDRIN (San Diego Regional Intelligence Network), which gives nonclassified information and links to various law enforcement sites and related items. He recommended that the FBI give a similar demonstration to the Public Safety Committee. Other issues covered at the Management Committee meeting are being covered today.

7. INTEROPERABILITY AND COMMUNICATIONS WORK PROGRAM (Chief Zoll) APPROVE

Chief Zoll stated that interoperability was rated as the number one priority identified by the Needs Assessment, but that not everyone has a common understanding on what interoperability means. Some key goals of this work program include creating a better understanding what is going on at the local and federal level, developing a legislative strategy, creating a three- to five-year plan, and defining the role of the Public Safety Committee. As part of this work program workshops are proposed starting this fall.

Vice Chair Christy Guerin (North County Coastal) asked which groups would be included in these workshops.

Chief Zoll stated that the Public Safety Committee would be invited along with other elected officials and fire and police chiefs that would be interested. Once these workshops are completed, we may want to then go out and share the information with other groups.

Gary Gallegos (Executive Director, SANDAG) noted there is a fiscal challenge to making this happen, with an estimated cost of approximately $52,000. If approved, SANDAG will look for funds to accomplish this program.

Action: Upon a motion by Mayor Mark Lewis (East County) and a second by Chairwoman Pam Slater-Price, the Public Safety Committee unanimously approved the interoperability and communications work program.

8. ESTIMATING ECONOMIC IMPACTS OF BORDER WAIT TIMES AT THE INFORMATION SAN DIEGO-BAJA CALIFORNIA BORDER REGION (Elisa Arias)

Elisa Arias (SANDAG Senior Transportation Planner) gave a PowerPoint presentation on the results of a study of wait times at the San Ysidro, Otay Mesa, and Tecate borders and the economic impacts they create. More than 60 million trips cross the San Diego-Baja California border annually, with most of the trips ending at a destination in Tijuana or San Diego.
County. At today’s level of wait (45 minutes average), more than eight million trips are lost, which results in significant revenue loss to both countries. Around three-quarters of those surveyed would be willing to pay $3 to use a proposed new Otay Mesa crossing some or all of the time.

Chairwoman Slater-Price stated that in the mid-1990s Senator Feinstein proposed a $1 fee to cross the border and it was turned down.

Gary Gallegos stated a challenge for a new border crossing has been financing, but we have to help ourselves and not rely on state and federal financing.

Councilmember Young stated it was a good report, but could have gone one more step to tie into public safety. Vice Chair Guerin agreed.

Gary Gallegos stated the study was designed to look at economic impacts, but that the results were related to public safety because of the simultaneous need to maintain a secure border using the latest technology.

Mayor Lewis inquired if the Public Safety Committee has any authority related to pursuing an additional border crossing.

Vice Chair Guerin stated that the Public Safety Committee could make a recommendation to the SANDAG Board regarding an additional crossing.

Councilmember Young stated there are many issues associated with a new border crossing and will be looking forward to receiving more information on the issue.

9. SOUTHWEST REGION HIDTA ACTIVITIES AND PROJECTS (Kean McAdam, INFORMATION California Border Alliance Group)

Kean McAdam gave a PowerPoint presentation on High Intensity Drug Trafficking Area (HIDTA) Program. There are 28 HIDTAs in the United States. Mr. McAdam is with the Southwest Border HIDTA (San Diego and Imperial County). CBAG’s HIDTA Program was formed in 1990, and the HIDTA Board requires representation from federal, state, and local governments. Marshal David Bejarano is the Chair of CBAG. Several Public Safety Committee members are also members including Daniel Dzwilewski, Chief Richard Emerson, Sheriff William Kolender, Honorable Carol Lam, and Chief William Lansdowne.

A San Diego/Imperial County Regional Law Enforcement Coordination Center (LECC) has been proposed. This would be a multi-agency coordinating and information-sharing center in the San Diego region. Included in the project would be the San Diego/Imperial Counties Narcotics Information Network (NIN) and Watch Center, the Joint Terrorism Task Force (JTTF), FBI Field Intelligence Group, local Intelligence Units (from local police departments), State Criminal Intelligence Bureau (CIB), Federal Intelligence Units (ICE, DEA, USBP), and San Diego County Terrorism Early Warning (TEW) Group. The LECC would network with the Imperial County LECC and the Sector Command Center also known as the Joint Harbor Operations Center (JHOC). San Diego Regional Terrorism Threat Analysis Center (a state program) and the Intelligence Fusion Center (gives federal intelligence information on
homeland security to the departments in San Diego) would also be included. Funding has been identified with HIDTA and Department of Homeland Security (DHS) grants and the FBI has stated it will pay the rent for at least 10 years. At the present time, a 65,000 square foot building located on Ruffin Road is proposed. If all goes well, the LECC could be operational by the end of the year.

10. REQUEST FOR SANDAG TO TAKE A POSITION ON PRIVATE CITIZEN DISCUSSION/ BORDER PATROL ACTIVITIES IN SAN DIEGO COUNTY (Chair Steve Padilla) POSSIBLE ACTION

Enrique Morones, President and Founder of the Border Angels, described his group’s history and asked that SANDAG take a position against vigilante groups, noting that not taking a position is in effect taking a position. Kristin Smith, member of Gente Unida, noted that it is important to tell vigilante groups they are not welcome.

Chair Padilla introduced Luis Cabrera Cuaron, Consul General of Mexico. Consul General Cabrera thanked the committee for the invitation to share with the committee concerns his country has with these groups. These include individuals acting without authority and taking the law into their own hands and potential violations or abuses that can occur. He recognized the support of these groups first in Arizona and California.

Councilmember Young stated he is very concerned about the security of our borders and the need for a solution to our immigration issues. He also noted that it is not acceptable for untrained individuals to detain others, and we need to ensure trained law enforcement officers have the tools they need to do their jobs. He noted the Public Safety Committee has the opportunity to make a strong statement and that we do not need individuals who are not border agents protecting our border.

Mayor Lewis stated that we should acknowledge people have a constitutional right to congregate. He also noted that we need to be aware that other groups ask for SANDAG’s support, and we should be aware of setting precedents.

Councilman Ron Newman (North County Inland) stated that when the Public Safety Committee was formed, it was to support the Chiefs and Sheriff. He asked if local law enforcement has taken a position on this issue.

Marshal David Bejarano (Federal Public Safety) noted that the San Diego County Police Chiefs’ and Sheriff’s Association held a press conference and released a statement on the issue. Their position is that individuals who are obeying the law have a right to be in public places, that law enforcement is responsible for protecting the rights of all individuals, and that local agencies will reallocate resources as necessary to protect all individuals involved.

Councilmember Young asked Marshal Bejarano if additional resources are being allocated because of these activities and noted that these resources could be utilized in other areas.

Chief Zoll noted other key components of the statement, including local law enforcement’s absolute support for the Border Patrol and its activities, that the topic of illegal immigration is a political issue at the national level, that we may have to allocate additional resources to
Chairwoman Slater-Price stated the tragedy is that we do not have a clearly defined leadership position on the issue at the highest levels of government and that local jurisdictions are faced with issues they do not have the authority to address. People on both sides of this issue have the right to assemble and share their points of view. Over the years numerous groups have approached SANDAG, asking the Board to take a position despite fact that SANDAG is governed by rules limiting what issues can be addressed. Chairwoman Slater-Price made the motion that the Public Safety Committee support the Border Protocol issued by the San Diego County Police Chiefs’ and Sheriff’s Association.

Vice Chair Guerin noted that she appreciated everyone’s comments, that this is a very complicated issue, and that she is comfortable that the Chiefs and Sheriff have gotten together to release this statement. Hate crimes do not just occur at the border, they occur in all of our communities and in many different ways. It is important that any violations of the law are addressed, not just those committed by a certain group or individual. Vice Chair Guerin expressed her agreement that we support the position our law enforcement agencies have taken.

Barbara Jean Harris (ARJIS Administrative Aide) read the Chiefs’ and Sheriff’s complete statement for the record:

The following statement is issued by the San Diego County Chiefs’ and Sheriff’s Association on behalf of local, state, and federal law enforcement agencies whose jurisdictions include the border area within San Diego County.

The United States Border Patrol of U.S. Customs and Border Protection is responsible for securing the international border between the ports of entry, and their agents do an outstanding job of enforcing our nation’s immigration laws in this Sector. The local, state, and federal law enforcement agencies within San Diego County have a close working relationship with the Border Patrol of U.S. Customs and Border Protection. The chief law enforcement officers regularly communicate about enforcement issues of mutual interest in the border area.

As “Operation Border Watch” begins, San Diego County law enforcement agencies recognize that there are differences of opinion about immigration within our community. The topic of illegal immigration is currently the subject of heated national debate, and we are mindful of the potential for increased tension within the coming weeks and months. We respect the First Amendment guarantees of free speech and free expression, and we remain committed to preserving the peace as immigration issues are debated within our community. The San Diego County law enforcement agencies anticipate that it may be necessary to reallocate resources to provide not only for the safety of local residents of our community, but also for those who participate in “Operation Border Watch” as well as those who protest in opposition.

The San Diego County law enforcement agencies encourage everyone on all sides of the immigration debate to maintain civility and nonviolence throughout “Operation Border Watch.” Under no circumstances will hate crimes or any other
violations of law be tolerated. As always, we encourage members of our community to report suspicious or criminal activity for appropriate action by law enforcement professionals.

Chief William Lansdowne (County Chiefs’ and Sheriff’s Association) stated that in many instances, law enforcement may have to defend groups they aren’t comfortable with. He also asked if the Public Safety Committee would make a recommendation to the Board or issue its own statement.

Julie Wiley (SANDAG Deputy General Council) stated that if this committee wanted to take a formal written position, the position letter or statement could come from ARJIS. If a formal written position was desired from SANDAG, the Committee could make a recommendation to the SANDAG Board, and the SANDAG Board would have to take action.

Mayor Lewis expressed that he thought it was the Public Safety Committee’s task to make a statement.

Councilmember Anthony Young stated he agrees with Chairwoman Slater-Price statement. He felt that it should also include: “This committee believes that our established and well-trained law-enforcement personnel are best qualified to protect the San Diego border with Mexico.”

Vice Chair Guerin stated that in listening to Councilmember Young’s statement, it was not wrong or different from the Chiefs’ and Sheriff’s statement. She would consider that his statement preface the border protocol statement.

Chair Padilla believes it is good language and should be able to incorporate it easily into any statement that is made.

Mr. Morones thanked the committee for discussing this issue and noted that SANDAG’s mission statement allows the agency to take positions on topics pertinent to the region’s quality of life. Noting that this is definitely pertinent to the region’s quality of life, he also said that it is very important that we become educated about these issues. Latinos are being targeted, and no one can tell whether a person is documented or not.

Chair Padilla stated he can support the Chiefs’ and Sheriff’s statement, but feels it could be stronger and that he doesn’t have any doubt that this is a matter of public safety, not just for those that are crossing the border illegally, but also for our own citizens. He feels the SANDAG Board of Directors has a responsibility individually to go back to their City Council and make statements.

Dave Druker (Alternate, North County Coastal) stated he is sure the City of Del Mar would be supportive of the position.

Action: Upon a motion by Chairwoman Slater-Price and a second by Chief Zoll, the Public Safety Committee unanimously approved supporting the Border Protocol issued by San Diego County Police Chiefs’ and Sheriff’s Association on July 14, 2005 with the inclusion of the statement that the Public Safety Committee believes that established and well-
trained law enforcement personnel are best qualified to protect the San Diego region’s border with Mexico.

11. UPCOMING MEETINGS

The August 19, 2005, Public Safety Committee was cancelled. The next meeting of the Public Safety Committee is scheduled for Friday, September 16, 2005, at 1 p.m.

12. ADJOURNMENT

Chair Padilla adjourned the meeting at 3:05 p.m.

INTEROPERABILITY AND COMMUNICATIONS WORKSHOP UPDATE

Introduction

At its July 15, 2005 meeting, the Public Safety Committee (PSC) approved the proposed interoperability and communications work program and directed staff to plan the workshops, finalize the project cost estimate, and identify funding options for carrying out the work program. An update of recent activities and achievements related to these planning activities is presented, along with a revised timeline for project milestones.

Discussion

As discussed at the July 2005 PSC meeting, staff has developed a work program and preliminary budget to hold a series of workshops to provide the latest information to local policymakers and public safety officials regarding what is the current status of interoperability and communications across the nation, what is the current status locally, and what key elements/principles should be included in a vision and communication plan that would be developed under this work program.

Since July, staff has been meeting internally, as well as with external local and federal agencies, to discuss the goals of the workshops, the feasibility of having San Diego serve as a demonstration site, and the possibility of securing outside funding and in-kind resources. Specifically, staff has met with representatives from the Department of Homeland Security (DHS), both locally and at the federal and state levels, the National Institute of Justice (NIJ), and the International Association of Chiefs of Police (IACP). Initial feedback from these contacts has been extremely positive, with officials from both NIJ and DHS offering to assist with the development of the workshops, with an expectation to use the workshops as a model for national deployment to other regions. In addition, staff has identified subject matter experts from around the country who are willing to contribute to this important regional endeavor and come to San Diego and participate in workshops.

Next steps will include developing the workshop curriculums, identifying and confirming the presenters, and selecting a facilitator, with the goal of returning to the PSC in November with a final work plan and budget.
Timeline

- October - December 2005  Staff works with other agencies to finalize workshop content and materials
- November 2005  Staff presents a final work plan and budget to the PSC for approval
- January 2006  First workshop held
- February 2006  Second workshop held
- March 2006  Third workshop held
- April 2006  Strategic vision created
- June 2006  Strategic plan drafted

FY 2006 PRIORITY ARJIS PROJECTS

Introduction

The approved SANDAG FY 2006 Overall Work Program (OWP) and Budget includes $1.23 million for ARJIS application development and system enhancements. After final budget approval, the ARJIS Business and Technical Committees identified priority initiatives to be completed during this fiscal year, utilizing the budgeted development and enhancement funds. The attachment includes the project description, costs, benefits, and percent completed. Some of the projects began in FY 2005 and are being carried over into FY 2006.

Recommendation

The Chiefs’/Sheriff’s Management Committee is recommending the Public Safety Committee approve the attached list of projects, prioritized at their September 7, 2005 meeting.

Discussion

Upon final approval of the SANDAG Overall Work Program (OWP), the ARJIS member agencies submitted their requests for project development and enhancements for the year. These recommendations were reviewed by ARJIS staff and cost estimates, timelines, and critical dependencies documented. ARJIS also ensured the proposed enhancement and/or development projects are consistent with the ARJIS Strategic Plan and conform to standards approved by the ARJIS agencies.

In August, the projects were presented to both the ARJIS Business and Technical Committees, who prioritized the projects based on cost considerations, state or federal mandates, the effect on public safety, and compliance with the region’s justice standards. Projects of significance include a new crime mapping and regional e-Watch community mapping application, the implementation of the COPLINK investigative tool, enhanced applications for the field officer, and the recruitment of a consultant to complete the Request for Proposal (RFP) for the new Enterprise ARJIS System.

2004 DRUG USE STATISTICS FOR ADULT AND JUVENILE ARRESTEES

Introduction

In 2004, interviews were conducted with local adult and juvenile arrestees as part of an ongoing data collection effort called Substance Abuse Monitoring (SAM). Updated statistics and trend data detailing drug use histories, urinalysis results, and self-reported risk behaviors were recently released to local policy makers, as well as professionals from prevention, treatment, and law enforcement. This presentation will highlight key findings and outline possible implications for the region as we work together to combat substance abuse in our communities.

Discussion

Data collected from interviews with 526 adult males, 278 adult females, and 175 juveniles at local detention facilities in 2004 were recently analyzed and summarized in a series of three CJ bulletins (released in May, August, and September 2005). As part of this project, arrestees are approached within 48 hours of their arrest and booking into jail by civilian interviewers. If the arrestee is available and willing to participate, s/he is asked a series of questions related to her/his drug use history and to provide a urine sample for drug testing. Data collection efforts in 2004 were funded by the California Border Alliance Group, with SANDAG Criminal Justice Clearinghouse funds supporting the analysis and dissemination of the results.

Adults

In 2004, 69 percent of adult male arrestees and 72 percent of female adult arrestees tested positive for one or more of the major drugs (marijuana, cocaine, heroin, PCP, and methamphetamine (meth)). Males were significantly more likely to test positive for marijuana than females (38% versus 28%), and females were significantly more likely to test positive for cocaine than males (23% versus 11%), but there were no differences in current meth or heroin use in this sample. Additional analyses also revealed that:

- approximately one in three arrestees had ever illegally used prescription drugs and that these individuals were also more likely to currently use illicit drugs;
- individuals were more likely to travel outside their own neighborhoods to obtain marijuana and crack, compared to those obtaining powder cocaine, heroin, and meth;
- almost three-quarters of arrestees currently use tobacco in some form;
- only one-third of arrestees had previously received any type of drug treatment; and
- adult arrestees were more likely to report using marijuana at an earlier age (14 years on average) than any other drug, including alcohol.
As these statistics show, despite recent efforts to address the relationship between drug use and crime (e.g., Proposition 36), substance use among the arrestee population remains a significant issue. Because drug-using arrestees put themselves, as well as others at risk (i.e., by operating vehicles or working under the influence), it is important that all sectors of the community, including local businesses, be cognizant of the real effects of drug use. In addition, the high prevalence of tobacco use among the population, coupled with the small percentage reporting they have health insurance, speaks to an ongoing public health issue that needs to be addressed.

**Juveniles**

During 2004, just under half (47%) of juveniles tested positive for some type of substance, which was the first decrease (from 56% in 2003) in five years. Other key findings from the interviews with these youth revealed that:

- more than three out of every four juveniles had tried alcohol, marijuana, and tobacco at least once and half or more had used the drug in the past 30 days;
- youth who reported their parent(s) had used or currently use drugs were more likely to have tried drugs themselves;
- a much smaller percentage of youth perceived any risk associated with marijuana use (33%), compared to tobacco (70%);
- youth who were not currently enrolled in school were significantly more likely to be currently using meth;
- most youth reported using alcohol and other drugs at a friend’s house and that they obtained the substance from a friend or family member; and
- almost half of the youth reported riding in a car in the last year with a driver who had used alcohol or other drugs.

While the recent decrease in the percent of youth testing positive for drugs is a positive change, these drug use trend statistics need to continue to be monitored to determine if this is a lasting trend. Most of the youth participating in this study express the belief that alcohol and marijuana use is not harmful to them and also feel these substances are easy to maintain. These statistics support the need for ongoing prevention efforts in our communities. In addition, the relationship between parental and child drug use speaks to the necessity of breaking the cycle of drug dependency in families. Finally, these statistics are also consistent with previous research showing the importance of keeping youth in school and addressing truancy and other behavior problems when they first appear. With a potentially significant number of youth going to school intoxicated or under the influence of drugs, regional training for school staff in how to identify and address these issues may be helpful.

**Methamphetamine Addendum**

Because of the relatively high rate of meth use in our region and to learn more about the drug in order to help curb its use, additional questions regarding meth use have been included as part of this project since 1996. Specifically, arrestees who report meth use in the past 30 days are asked to complete an additional questionnaire. Awareness of this growing meth trend is now being seen at the national level, with increased attention coming from the federal government as they express
their support for developing a comprehensive balanced approach to the meth challenge that includes supporting legislation to fight the production, trafficking, and abuse of this drug.

Despite local efforts, 43 percent of adult males, 42 percent of adult females, and 13 percent of juveniles tested positive for meth in 2004. These rates were all higher than they were in 2000 (when they were 28%, 29%, and 11%, respectively). Local experts have noted, however, that these rates would be even higher if current efforts targeting the distribution of precursor chemicals had not been put in place. Other key findings included:

- juveniles were more likely than adults to begin using and continue using meth because of peer influence;
- around two-thirds of adult and half of juvenile meth users reported using meth before going to work/school;
- juveniles were more likely to report experiencing hallucinations, paranoia, and violent behavior after using meth, compared to adults;
- even though most arrestees report not making meth themselves, half of adults and juveniles who used meth in the past 30 days reported participating in the distribution of meth in the past year; and
- compared to 2003, more arrestees reported the quality of meth they had obtained was worse in 2004, but the price was higher.

Once known as the meth capital of the world, San Diego has made significant gains in addressing the devastating effect this drug can have on our communities. However, as these statistics show, despite the fact that supply seems to have recently been impacted by law enforcement efforts, there still appears to be significant need for continued prevention and treatment efforts in the region.

**Project Future**

Originally sponsored by the National Institute of Justice, funding for this project was terminated in 2004. Recognizing the importance of these data to inform local practice and policy on the current trends in substance use among adults and youth, CBAG took the initiative to sponsor both the youth and adult data collection for calendar year 2004. This funding has allowed data collection to occur twice yearly (a 50% reduction from the NIJ-funded effort). During 2005, additional funding support was successfully obtained from ARJIS, the San Diego County Public Safety Group, San Diego County Alcohol and Drug Services, and the San Dieguito Alliance for Drug Free Youth. However, additional contributions ($30,000) are still required for the SAM project to continue at its current level in 2006. Staff is currently exploring the possibility of securing these additional funds from local and state groups and foundations.

CRIME MAPPING PROJECT

Introduction

A deliverable in the SANDAG FY 2006 Work Program is the development of a new ARJIS crime mapping application available to both the public and law enforcement. The application will replace the existing crime mapping available on the ARJIS Web site and provide enhanced search capabilities and access to additional data sources. It will also expand the e-mail-based crime map notification service (eWatch) regionwide. eWatch is currently only available to City of San Diego residents. Staff will provide a status of the project and a high-level overview of the application.

Discussion

ARJIS is currently developing a Web-based crime incident mapping and reporting application called Crime MAPS for use by community members and law enforcement personnel throughout the San Diego region. The project, which has received $250,000 in financial assistance from the National Institute of Justice (NIJ), is currently 40 percent complete, with an estimated completion date of Spring 2006. This cross-jurisdictional and cross-disciplinary application is one of the few in the nation that includes data from different justice agencies such as warrants, crimes, and traffic incidents that can be correlated with a variety of map layers including schools, parks, hospitals, and alcohol beverage control establishments.

The public mapping site available on the internet will have enhanced search capabilities such as day-of-week and time-of-day searches for up to two years. Access to near real time data sources and the ability to map and analyze across jurisdictional boundaries will allow the public to become more knowledgeable about crime trends and patterns in the various neighborhoods throughout the San Diego region. Privacy is a high priority and will be ensured by only providing a limited amount of information about the crime and no exact addresses or individual names.

The law enforcement application will be available to the 61 ARJIS member agencies using ARJISNET, the secure justice network. Law enforcement will be provided with a much richer data set to include all crime, arrests, parolees, gang, warrants, and other critical information. Officers will have increased knowledge about crime trends and patterns in their service area, notification if the crime problem they've been addressing has moved into the next beat/division/city, and up-to-date information for community meetings. Officers will not have to wait for an analyst to make maps since they will be easily accessible from any ARJISNET computer.
User, technical, and policy committees composed of representatives from member agencies have been providing input and feedback on user requirements, design, data, and functionality. These committees will be crucial to successful user testing and final customer acceptance of the application. A focus group composed of representatives from the public will also be formed to provide feedback on the public-only mapping application.

Once the application is implemented, a regional e-Watch enhancement will be added. This enhancement will provide subscription services to the public to register up to three addresses anywhere in the County and receive email notifications with maps every 24 hours when crimes occur within the specified radius of the subscribed addresses. eWatch is currently available only to residents of the City of San Diego.

Additional data sources to be available in crime maps include critical infrastructure and CAD 911 calls for service. Discussions are also underway to interface the crime maps with Homeland Security mapping, the Border Patrol Mapping application, North County Fire, and other Public Safety mapping applications. This will ensure a centralized and organized approach to mapping for the region.
