CITIES/COUNTY TRANSPORTATION ADVISORY COMMITTEE (CTAC)

The CTAC may take action on any item appearing on this agenda.

Thursday, May 7, 2009

09:30 to 11:00 a.m.

SANDAG, Conference Room 7
401 B Street, Suite 800
San Diego, CA  92101-4231

Chair:        Frank Rivera, City of Chula Vista
Vice Chair:   Robert Johnson, City of Carlsbad

Staff Contact:  Dan Martin
                (619) 699-6987
                dma@sandag.org

AGENDA HIGHLIGHTS

• LONG-RANGE REGIONAL PLANS AND FORECASTS: A WORK PLAN TO COMPLY WITH SENATE BILL 375

• UPDATED LOCAL ARTERIAL COSTS AND PHASING FOR THE 2050 REGIONAL TRANSPORTATION PLAN

• FUTURE CONGESTION MANAGEMENT PROGRAM PROCESS

SANDAG offices are accessible by public transit.
Phone 1-800-COMMUTE or see www.sdcommute.com for route information.

In compliance with the Americans with Disabilities Act (ADA), SANDAG will accommodate persons who require assistance in order to participate in SANDAG meetings. If such assistance is required, please contact SANDAG at (619) 699-1900 at least 72 hours in advance of the meeting.

To request this document or related reports in an alternative format, please call (619) 699-1900, (619) 699-1904 (TTY), or fax (619) 699-1905.
ITEM #

1. INTRODUCTIONS

+2. SUMMARY OF APRIL 2, 2009, CTAC MEETING

The summary for the April 2, 2009, CTAC meeting is attached. CTAC is asked to review and approve the meeting summary.

3. PUBLIC COMMENTS

Members of the public will have the opportunity to address the Working Group during this time.

+4. LONG-RANGE REGIONAL PLANS AND FORECASTS: A WORK PLAN TO COMPLY WITH SENATE BILL 375 (Coleen Clementson)

The passage of Senate Bill (SB) 375 and provisions included in the 2008 Settlement Agreement (Settlement Agreement) regarding the 2030 Regional Transportation Plan (RTP) Environmental Impact Report significantly change how staff will prepare the next RTP and Regional Housing Needs Assessment. Both also set the stage for a future update of the Regional Comprehensive Plan. SANDAG staff has responded to these new requirements in the draft FY 2010 Budget and Overall Work Program. The purpose of this informational report is to provide an overview of the proposed work plan and its key elements. This report was presented to both the Transportation Committee and Regional Planning Committee on April 3, 2009. The report to the Transportation Committee is attached.

5. UPDATED LOCAL ARTERIAL COSTS AND PHASING FOR THE 2050 REGIONAL TRANSPORTATION PLAN (Heather Werdick and Jose Nuncio)

In preparation for the 2050 Regional Transportation Plan (RTP), SANDAG staff requests that local jurisdictions provide updated cost estimate and phasing information for local streets and roads. A local streets and roads survey was last completed in 1999 for the 2020 RTP. Additional information regarding specific data needed and timing will be presented at a future CTAC meeting.
6. FUTURE CONGESTION MANAGEMENT PROGRAM PROCESS (Heather Werdick)  

SANDAG staff evaluated two options for future direction of the CMP which have been discussed at previous CTAC meetings. These two options are scheduled to be presented at the May 1, 2009, Transportation Committee meeting. Staff will provide an update to CTAC regarding these options.

7. CALTRANS UPDATES (Luis Medina, Caltrans)  

An update on various Local Programs, funding program deadlines, and announcements regarding upcoming conferences will be provided.

8. ANNOUNCEMENTS  

CTAC members are encouraged to share items of interest.

9. UPCOMING MEETING  

The next CTAC meeting is tentatively scheduled for Thursday, June 4, 2009, from 9 to 10 a.m. Immediately following the CTAC meeting, Caltrans will be holding an agency Team Building meeting from 10:30 a.m. to noon. Both meetings will be held at the Garcia Room of the Caltrans Offices located at 4050 Taylor Street in San Diego.

Introductions

Frank Rivera (CTAC Chair) chaired the meeting. Meeting participants introduced themselves.

Meeting Summary

CTAC Members reviewed and approved the meeting summary for the March 5, 2009, CTAC meeting.

Public Comments

There were no comments from the public.

Future Congestion Management Program Process

Heather Werdick (SANDAG) provided an overview of the Congestion Management Program (CMP) Process and progress to date, noting that the County of San Diego had requested additional time to evaluate the options. Heather stated that the CMP options are now scheduled to be presented to the Transportation Committee on April 17, 2009. Heather also informed CTAC members that the Transportation Committee report will be similar to the one that was included for the March 20, 2009, meeting (currently posted on the SANDAG Web site) but was subsequently taken off the agenda.

Bob Johnson (Carlsbad) asked what the County’s concerns were with the options. Heather responded that the County had requested clarification on the Federal process and wanted to review the legislation regarding opting out. In addition, she mentioned that the County wanted to complete a thorough review to identify references to the CMP program. Terry Rayback (County) also mentioned that the County wanted to review the proposed changes to determine if any unintended consequences would potentially result from the proposed CMP changes under consideration.

San Diego Region American Recovery and Reinvestment Act (ARRA)

Dan Martin (SANDAG) provided an update on recent actions taken by the SANDAG Board in support of the program, including actions taken to program ARRA funds on State Route 76,
805/Carroll Canyon, and the Grossmont Pedestrian Bridge. As part of the actions, an additional allocation of TransNet will be provided to the local jurisdictions. There was some discussion regarding the specific amendment deadlines for programming the funds. Dan Martin agreed to forward the information to CTAC members.

**Caltrans Updates**

Luis Medina (Caltrans) announced the following:

**Safe Routes to School**
A reminder was provided for the call for projects for the Safe Routes to School program.

**Notification of a Change to the DBE Program**
A reminder was provided regarding the FHWA change from a race neutral to a mandatory race conscious Disadvantaged Business Enterprise (DBE) program. Local agencies have until June 2, 2009, to transition to the newly approved race conscious program. Contracts awarded after June 2, 2009, shall include the new requirements.

**Local Agency Utility Training**
Luis Medina distributed a handout regarding Local Agency Utility Training being held at District 11 Caltrans for Local Agency and Consultant staff. The training is scheduled for May 5, 2009.

**TransNet Smart Growth Incentive Program**

Christine Eary (SANDAG) provided an update on the Smart Growth Incentive Program, including projects submitted, a discussion on the project selection process, and project recommendations for capital and planning projects submitted under this program. Christine distributed lists of the project priority recommendations for both the Capital and Planning portions of the program. Christine explained that the planning Technical Working Group (TWG) will review the recommendations at their April meeting and that the recommendations will be presented to the Regional Planning Committee in May.

**Announcements**

There were no announcements.

**Next Meeting**

The next planned meeting of the CTAC will be Thursday, May 7, 2009, at 09:30 a.m. It will be held at the SANDAG offices in Conference Room 7.
LONG-RANGE REGIONAL PLANS AND FORECASTS:
A WORK PLAN TO COMPLY WITH SENATE BILL 375

File Numbers 3000200 and 3000400

Introduction

The passage of Senate Bill (SB) 375 and provisions included in the 2008 Settlement Agreement (Settlement Agreement) regarding the 2030 Regional Transportation Plan Environmental Impact Report (EIR) significantly change how SANDAG will prepare the next Regional Transportation Plan (RTP) and Regional Housing Needs Assessment (RHNA). Both also set the stage for a future update of the Regional Comprehensive Plan (RCP). SANDAG staff has responded to these new requirements in the draft FY 2010 Budget and Overall Work Program. The purpose of this informational report is to provide an overview of the proposed work plan and its key elements to the Regional Planning Committee, Transportation Committee, and SANDAG Board of Directors.

Discussion

Compliance with SB 375 significantly changes how we will prepare the next RTP and RHNA. Provisions of the law require that:

- the California Air Resources Board (CARB) establish regional greenhouse gas (GHG) reduction targets;
- regional planning agencies create a Sustainable Communities Strategy (SCS) – a new element of the RTP – to strive to meet established GHG reduction targets or, if unable to meet the target, an Alternative Strategy (APS) must be prepared;
- regional planning agencies conduct extensive outreach and adopt a public participation plan for the SCS;
- the RHNA be synchronized with the RTP process and that the RHNA allocations be consistent with the SCS; and
- more extensive environmental review is conducted to ensure that local jurisdictions can benefit from the CEQA streamlining provisions included in the law.

The RTP Settlement Agreement further requires that SANDAG develop an Urban Core Transit Strategy and complete a study regarding the impediments to public transit as part of the 2050 RTP, to be adopted in July 2011. Other provisions of the Settlement Agreement have an indirect relationship to the RTP and are not specifically discussed in this report.

The proposed work plan includes several key efforts which are summarized below. Attachment 1 is a generalized work plan timeline.
2050 Regional Growth Forecast

A regional growth forecast is produced every four years to reflect the most current economic, demographic, land use, and transportation data and to keep pace with ongoing regional planning efforts such as the RTP and RCP. The last forecast provided growth projections and estimates to 2030. The upcoming forecast will provide growth projections and estimates to 2050.

Work is already underway to produce the 2050 Regional Growth Forecast which will be used in the preparation of the 2050 RTP, San Diego County Water Authority’s Urban Water Management Plan, and RCP. In October 2008, SANDAG staff initiated the local land use data collection process with the Regional Planning Technical Working Group (TWG) in order to prepare the “existing plans and policies” phase of the forecast. The TWG assists with local land use inputs, including existing land uses, planned land uses, and potential redevelopment and infill areas, all of which are important to the forecasting process and build upon the RCP smart growth principles. SANDAG has received input from all the jurisdictions in the region, and staff are now inputting and verifying the information in coordination with local planning staff. The second phase involves preparing alternative growth scenarios that can be applied to forecast years after 2025, beyond the horizon year of local general plans. Around the year 2025, the region also runs out of housing capacity based on current plans and future growth. SANDAG staff has started discussions with the TWG on the range of alternative scenarios to consider. The RPC and Board of Directors will be asked to weigh in on the alternative scenarios which will also be discussed in future public workshops this summer. The draft 2050 Regional Growth Forecast is anticipated in September/October 2009. The Board of Directors will be asked to adopt the 2050 Regional Growth Forecast for planning purposes in early 2010.

In addition to the TWG, a Technical Review Committee is being convened, composed of experts in demography, housing, economics, and other disciplines from state and local agencies, local universities, and the private sector. This committee is responsible for reviewing the regional model structure, data inputs and assumptions, and evaluating the forecast results.

Urban Core Transit Strategy

The RTP Settlement Agreement calls for SANDAG to develop an Urban Core Transit Strategy that evaluates possible regional transit strategies that maximize peak period transit mode share in the urban core. The strategy will result in three to four long-range strategic transit network alternatives that will be factored into the 2050 RTP. The transit network alternatives will be structured to significantly increase the attractiveness and use of transit, walking, and biking to make transit time-competitive with the private car and thereby to reduce vehicle miles traveled (VMT) in the greater San Diego region. It is anticipated that SANDAG will release the Request for Proposals for this work in May and select a consultant this summer.

Airport Multimodal Accessibility Plan (AMAP)

SANDAG is working with the San Diego County Regional Airport Authority (Authority) on the development of a Regional Aviation Strategic Plan (RASP) and an Airport Multimodal Accessibility Plan (AMAP). The Authority is lead for the RASP, which will identify workable strategies to improve the performance of the regional airport system. SANDAG is the lead for the AMAP, which will develop a multimodal strategy to improve surface transportation access to airports. The development of the RASP and AMAP will be a coordinated process between the Authority and
SANDAG. The overall schedule is designed to allow the RASP and AMAP to be incorporated into the 2050 RTP.

**Sustainable Communities Strategy (SCS) / Regional Housing Needs Assessment (RHNA)**

The SCS will be a new element of the RTP, as required by SB 375, to show how regional GHG targets would be achieved through development patterns, infrastructure investments, and/or transportation measures or policies that are determined to be feasible. Additionally, the SCS must be consistent with the RHNA and must address protection of sensitive resource areas, including areas protected under Habitat Conservation Plans (HCPs). If the SCS does not meet regional GHG targets, an Alternative Planning Strategy (APS) must be developed, which demonstrates what alternative and additional measures would need to be taken in order for the region to meet its target.

The adopted Smart Growth Concept Map which identifies existing, planned smart growth areas linked to existing and planned public transit along with the identified habitat planning areas will serve as a basis for the SCS. Additionally, the results of the Regional Climate Action Plan (RCAP) will provide ideas for additional measures that could reduce GHG emissions.

SB 375 changed previous housing element law by aligning regional housing planning with regional transportation planning. As a result of this change, the RHNA is on an eight-year cycle and will be conducted as part of every other RTP process (the RTP is updated every four years). Currently, SB 375 requires the San Diego region to adopt two housing elements within a 21/2-year period (June 30, 2010, and December 31, 2012). SANDAG staff is pursuing legislation to merge and clarify the deadlines.

**2050 RTP**

Federal law requires that an RTP be prepared every four years. In accordance with state and federal guidelines, the 2050 RTP is slated for adoption by the Board of Directors in July 2011. The planning efforts described in this report are key inputs or components for the development of a 2050 RTP that complies with SB 375, requirements of the Settlement Agreement, and air quality conformity. As part of the RTP development, goals and objectives from the 2030 RTP (adopted in 2007) will be revised and updated. The results of related work efforts such as the Regional Climate Action Plan, Regional Energy Strategy Update, Regional Bicycle Master Plan, Comprehensive Freight Gateway Forecast, high speed rail planning, corridor and subregional studies, collaborative projects with Tribal Nations as well as interregional and Binational strategies will be incorporated. Other major tasks include updates to the project evaluation criteria and plan performance measures, economic analysis of investment strategies, new revenue projections and project cost estimates. Additionally, the 2050 RTP will be subject to any new requirements established in the federal surface transportation reauthorization, which is anticipated to be passed in 2010.

The TWG and new Stakeholder Working Group will play an integral role in the development of the RTP along with the region’s public works directors and traffic engineers, who are represented in the Cities/County Transportation Advisory Committee (CTAC) and San Diego Traffic Engineers Council (SANTEC), respectively. The San Diego Region Conformity Working Group (CWG) will be consulted on the development of the air quality conformity analysis.
2050 RTP Environmental Impact Report (EIR)

The EIR for the 2050 RTP will require analysis that has not been included in previous RTP EIRs. The RTP environmental analysis will include GHG baseline measurements and projections, as well as potential mitigation measures that could reduce emissions. The EIR also will include analysis of the additional work products required by SB 375 and the Settlement Agreement.

In addition, as part of the environmental review process for the RTP, SB 375 includes California Environmental Quality Act (CEQA) streamlining provisions as an incentive to encourage certain types of projects, that help achieve the GHG reduction target and are consistent with the SCS. Cities and counties that find the CEQA streamlining provisions useful have the opportunity to align their planning decisions with the decisions of the region. It should be noted, however, that the CEQA streamlining provisions are not mandatory and are intended to be a tool that local jurisdictions may use, if desired.

RTP / SCS Public Participation Plan

SANDAG regularly involves the public in regional planning efforts. A public participation plan is being prepared to involve the public in every step along the way to develop the 2050 RTP and set the stage for a future RCP update. The plan will include the establishment of a new Regional Planning Stakeholder Working Group to provide input on the development of key work elements in the planning process, including the public participation plan. Additionally, there will be a series of public workshops and other means for involving the public and receiving input on the work products and draft 2050 RTP. SANDAG staff is making a special effort to consider alternative methodologies for engaging a wider diversity of citizens in the planning process, taking advantage of existing community networks.

Next Steps

In order to implement the proposed work plan, SANDAG will benefit from substantial work that has already been done toward meeting the requirements of SB 375 and the Settlement Agreement. The adopted Smart Growth Concept Map together with regional habitat planning areas will serve as a basis for the SCS. Additionally, the results of the RCAP will provide new tools toward reducing VMT and GHG. A number of planning efforts that will be incorporated in the 2050 RTP development have been initiated, such as the Interstate 5 South Multimodal Corridor Study, Mid-Range Transit Plan, and Freight Gateway Forecast.

SANDAG staff will provide a more detailed 2050 RTP work plan to the RPC, Transportation Committee, and Board of Directors in May.
