AGENDA ITEM NO.: **6**

Action Requested: DISCUSSION

SAN DIEGO REGION GRAFFITI TRACKER PROJECT:
IMPLEMENTATION RECOMMENDATION

File Number 2345800

Introduction

The San Diego County Multi-Discipline Graffiti Abatement Program pilot project is scheduled to end June 30, 2013. On March 6, 2013, options for transitioning the pilot program to ongoing, region-wide implementation were presented to the Chiefs'/Sheriff's Management Committee for discussion. The approach the Management Committee and staff are recommending is explained in this report.

Discussion

In January 2011, a regional pilot project, the San Diego County Multi-Discipline Graffiti Abatement Program (Graffiti Tracker Program), was launched with the goal of utilizing new technology to better identify and document graffiti, thus assisting with convicting the most prolific offenders through a coordinated regional effort. To ensure the findings from this pilot project were documented so the region's policy makers had a clear understanding of the usefulness of the graffiti tracking system, SANDAG provided resources to conduct a process and outcome evaluation of the pilot project.

Graffiti Tracker is a Web-based intelligence sharing and analysis service that allows photographs and locations of graffiti incidents to be submitted into a national database. Intelligence reports can then be generated that include information and statistics regarding the name or group monikers, location and size of incidents, trends or paths of damage, migration of vandals, and arrest information. Prior to January 2011, Graffiti Tracker was utilized by three law enforcement agencies in San Diego County: the Escondido Police Department, Oceanside Police Department, and the San Diego County Sheriff's Department. The seven other municipal law enforcement agencies, as well as the Port of San Diego and local transit agencies (Metropolitan Transit System and North County Transit District) did not have a formal tracking system in place.

As part of the pilot project, the Sheriff's contract was amended to include these additional jurisdictions coming on-line and the total cost for the initial 18-month effort for all of the regional partners was \$346,800 (\$166,800 for the ten new agencies and \$180,000 for the three original ones). (This was not including the initial cost of cameras which took place before 2011 for some jurisdictions and was supported with private donations for cameras purchased in 2011).

In SANDAG's evaluation report, dated June 2012, several highlights were outlined, most notably that although there were fewer graffiti cases prosecuted in 2011 as compared to 2010, the court-ordered restitution for these cases increased dramatically from \$170,626 in 2010 to \$783,412 in 2011, demonstrating the benefits of cross-jurisdictional sharing of graffiti data and how that sharing enables law enforcement to build stronger cases for prosecution. Additionally, the report identified that the vast majority of the users reported satisfaction with the system and recommended its continued use.

The report also recommended (if the pilot continued) that regional management and coordination among the participating partners would be essential to ensure the full use of the Graffiti Tracker system. This oversight, coupled with ongoing training to the agencies already using Graffiti Tracker, as well as outreach to other agencies where graffiti has been a problem such as the schools and universities, could lead to a higher number of agencies participating, resulting in more cases being submitted, and subsequently solved. The pilot was extended for an additional year and is scheduled to end June 30, 2013.

Implementation Proposal

To implement Graffiti Tracker as an ongoing program, it is proposed that the San Diego County Sheriff's Department continue to administer the contract for the Graffiti Tracker Program. The County Sheriff is in the process of negotiating a no-cost conversion of the existing contract to an Enterprise license that would allow the addition of new agencies, as well as provide query access to any of the 82 ARJIS member agencies.

It is further proposed that SANDAG provide the ongoing management, training, and outreach for the program, estimated to require one-half of a full-time ARJIS Project Manager. No additional staff would be required, and the SANDAG staff cost would be covered by the Graffiti Tracker Program. Staff plans to include this proposal in the Draft Public Safety Work Program and Budget being brought to Public Safety Committee for recommendation to the Board of Directors in April, incorporating any feedback received from the Public Safety Committee at its March 15, 2013, meeting.
