

# Driving Into the Future

Supporting San Diego Region's  
Plug-in Electric Vehicle Readiness

Plug-in electric vehicles (PEVs) are growing in popularity in the San Diego region and their numbers are expected to rise with California's goal of 1.5 million zero-emission vehicles on the road by 2025. With increasing PEVs comes a greater demand for residential, workplace and commercial electric vehicle charging stations (EVCS).

In support of PEV adoption, the Center for Sustainable Energy and the San Diego Association of Governments launched **Plug-In SD** to provide local stakeholders strategic and technical guidance to help ensure the San Diego region is PEV ready.

## Services for Target Audiences

Local Governments	Employers	Contractors	Multiunit Dwelling Building Owners	Electric Vehicle Dealerships
