Plug-in electric vehicles (PEVs) are growing in popularity in the San Diego region and their numbers are expected to rise with California’s goal of 1.5 million zero-emission vehicles on the road by 2025. With increasing PEVs comes a greater demand for residential, workplace and commercial electric vehicle charging stations (EVCS).

In support of PEV adoption, the Center for Sustainable Energy and the San Diego Association of Governments launched Plug-In SD to provide local stakeholders strategic and technical guidance to help ensure the San Diego region is PEV ready.
