TransNet Smart Growth Incentive Program and Active Transportation Grant Program Projects in National City

“Donuts and Displays” Open House
January 11, 2018
Smart Growth Incentive Program

- **8th Street Corridor Smart Growth Revitalization** ($2,000,000)
  Enhance ped and bike connections to Trolley Station and local businesses through streetscape improvements (utility undergrounding, wider sidewalks, lighting, landscaping, storm water LID, benches, trash receptacles and bike racks), traffic calming (road diet, medians, bulbouts, angle parking, high visibility crosswalks) and new bike lanes

- **Downtown-Westside Community Connections** ($2,000,000)
  Enhance ped and bike connections between Westside residential neighborhood and Downtown National City through traffic calming, ped crossing enhancements, new bike facilities and storm water LID on A Ave, Plaza Blvd, Coolidge Ave and 14th St

- **Downtown-Westside Wayfinding and Community Gateways** ($825,000)
  Enhance community gateways and implement a comprehensive wayfinding signage program for the Downtown, Westside and Marina District Specific Plan Areas to direct residents and guests to key points of interest such as historic districts, civic center, transit centers, public library, community parks and recreation facilities
**Project Descriptions**

**Smart Growth Incentive Program**
- **Westside Mobility Improvements ($2,000,000)**
  Enhance ped and bike connections within the Westside Specific Plan Area to Downtown, TOD and Trolley Station through traffic calming (roundabout, corner bulbouts, raised crosswalks), lighting, landscaping, new sidewalks, curb ramps and bike lanes

**Active Transportation Grant Program**
- **D Avenue Community Corridor ($600,000)**
  Construct 2.5 miles of Class II and III bike facilities along D Ave, including traffic calming, green bike boxes, reverse angle parking and ped crossing enhancements
- **Bicycle Parking Enhancements ($50,000)**
  Partnered with *A Reason to Survive (ARTS)*, a local non-profit organization based in National City, who hosted workshops for Sweetwater High School students to assist with design and fabrication of custom bike rack prototypes; CAD files were prepared based on the prototypes and sent to a local metal fabricator in National City for reproduction; bike racks were installed by City Public Works crews at parks, rec centers, public library, business districts, transit stops and other destinations along bicycle corridors
