BOARD OF DIRECTORS

The 18 cities and county government are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus; plans, engineers, and builds public transit; makes strategic plans; obtains and allocates resources; and provides information on a broad range of topics pertinent to the region's quality of life.

CRIME IN THE SAN DIEGO REGION MID-YEAR 2014 STATISTICS

INTRODUCTION

Since 1980, SANDAG has been compiling and reporting regional crime statistics for San Diego County and remains the only local source for regional statistics not available at the national level. This summary presents information regarding how many and what types of crimes were reported to local law enforcement in the first half of 2014 and how these numbers compare to prior years. These data are useful to local law enforcement agencies as they track the effectiveness of their prevention and response efforts on jurisdictional and regional crime rates.

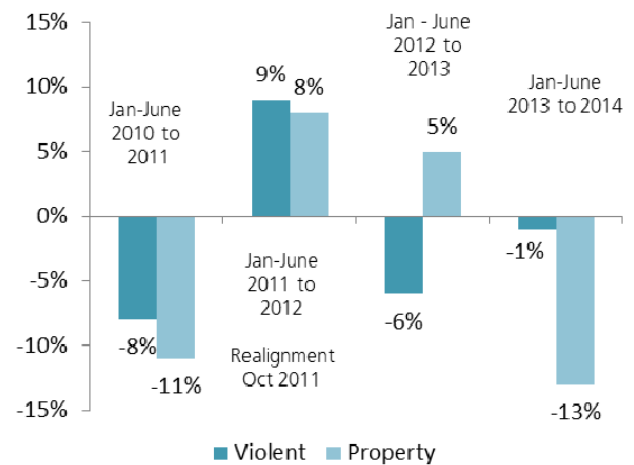

As Figure 1 shows, since 2010, there has been variation in the number of violent and property crimes reported across the first six months of the calendar year, both in comparison to one another and over time, with annual decreases for both violent and property crime in the first half of 2011 compared to 2010, (-8% and -11%, respectively), prior to the implementation of AB 109 (realignment)¹ in October 2011, followed by jumps in both (9% and 8%) in the first six months of 2012. During the first half of 2013 and 2014, the number of violent crimes decreased to some degree (-1%), but while the number of property crimes increased from the first half of 2012 to 2013 (5%), it actually decreased (-13%) from 2013 to 2014.

Over the past decade, criminologists and law enforcement professionals have cited a number of possible reasons for the historic drops in crime. When local law enforcement leaders were queried about why property crime was down in the first half of 2014, despite increases in the first half of the two prior years, a number of themes emerged, including proactive and collaborative efforts to ensure compliance with community supervision conditions by ex-offenders, the use of forensic technology to link and identify individuals

¹ As part of public safety realignment, the responsibility for supervising, housing, and rehabilitating certain felons was transferred from state to local counties. More information about realignment in San Diego County is available at www.sdcounty.ca.gov/probation/ccp.html.

associated with serial property crimes, working more closely with the community in crime prevention efforts, and utilizing cross-jurisdictional intelligence-led policing to identify and target prolific offenders and address crime trends as they appear.

Figure 1
ANNUAL MID-YEAR CHANGES IN THE NUMBER OF VIOLENT AND PROPERTY CRIME REPORTED IN THE SAN DIEGO REGION

SOURCE: SANDAG, 2014

HIGHLIGHTS

The region's 2014 mid-year violent crime rate (3.43 crimes reported per 1,000 population) was a slight decrease (-1%) from 2013 (3.45), with declines in the numbers of reported homicides (-7%) and robberies (-10%), but increases in the number of rapes (20%) and aggravated assaults (1%).

In comparison, the region's mid-year property crime rate dropped considerably (-13%), from 22.23 at mid-year 2013 to 19.40 at mid-year 2014, with decreases in the number of burglaries (-17%), larcenies (-12%), and motor vehicle thefts (-12%) that were reported to law enforcement.

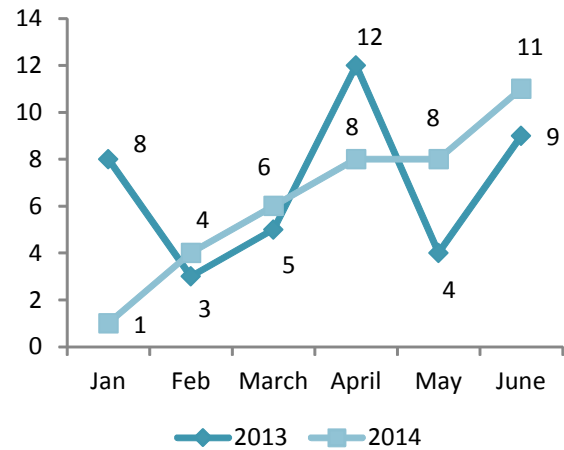

VIOLENT CRIME

- A total of 5,400 Part I violent crimes were reported to local law enforcement agencies in the region between January and June 2014 (Tables 1 and 6), an average of 30 per day (not shown). Part I violent crimes include homicide, rape, robbery, and aggravated assault.
- There were 38 homicides in the first half of 2014, a drop of seven percent from mid-year 2013 when 41 occurred (Tables 1 and 8).
- The number of rapes reported across the region increased 20 percent to 376 in the first half of 2014, from 314 in 2013 (Table 1). While assaults on females by possible serial offender(s) appear to be on the rise at the time of the publication of this Bulletin, this large increase does not reflect a trend at this point, as this increase follows a 16 percent drop from 2012 to 2013, a 27 percent increase from 2011 to 2012, and three prior decreases (-9%, -9%, and -12%) from 2008 through 2011. The percent of reported rapes that were completed (versus attempted) was 74 percent at mid-year 2014, the same proportion as 2013, but smaller than the 85 percent in 2010, possibly suggesting better reporting (not shown).
- The number of robberies decreased during the first half of 2014 to 1,331 from 1,473 in the first half of 2013, a ten percent decline (Tables 1 and 8).
- The 3,655 aggravated assaults reported during the first six months of 2014 represented a one percent increase from the prior year (3,605) (Tables 1 and 8).
- A total of 8,331 domestic violence incidents were reported to law enforcement the first half of 2014. This was an increase of four percent from mid-year 2013 (8,019) and a decrease of two percent from mid-year 2010 (8,544) (not shown).

INSIGHTS: HOMICIDES

In the first half of 2014, the 38 homicides reported equated to about one every five days. Figure 2 shows the number of homicides that were documented by law enforcement by month in 2013 and 2014 across the region.

Figure 2
NUMBER OF HOMICIDES BY MONTH FOR THE SAN DIEGO REGION

- For the 12 homicides where motive could already be determined, half (6) involved an argument, one-third (4) a domestic violence incident, and one each was attributed to gangs or a lover's triangle.
- For the 35 homicides where a location was identified, around half (51%) occurred at a residence, 29 percent on a street or in a parking lot, and 20 percent in other locations (that included commercial areas, public use areas, and vehicles).
- For the 32 where a weapon could be determined, 59 percent involved a firearm, 22 percent a knife or other sharp object, and 19 percent a personal weapon, blunt object, or strangulation/hanging.
- The population of the San Diego region is 3.15 million and there were 41 homicides at mid-year 2013 and 38 at mid-year 2014. For comparison purposes, Los Angeles, with a population of 3.86 million, had 133 homicides at mid-year 2013; and Chicago, with a population of 2.71 million, had 179 homicides during the same six-month period.

SOURCE: SANDAG, 2014

- Across the 19 jurisdictions, the number of violent crimes decreased (since the same time period one year ago) in 11 jurisdictions, increased in 5, and 3 had numbers too small to calculate the percent change. Decreases ranged from 2 percent (in Chula Vista) to 29 percent (in Imperial Beach) (Table 6).

PROPERTY CRIME

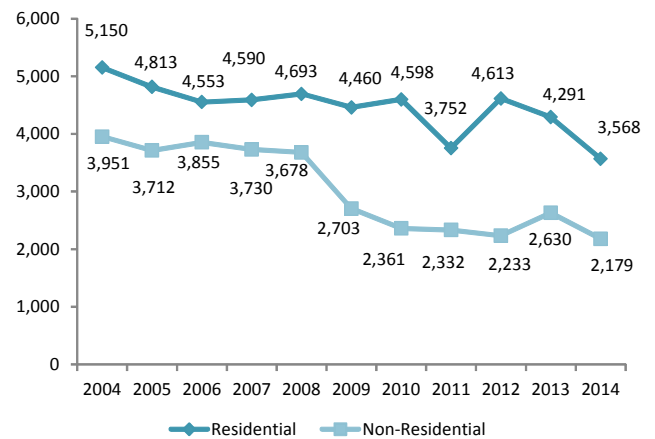

- A total of 30,549 property crimes were reported to local law enforcement in the first half of 2014 (Tables 1 and 7). Sixty-five percent (65%) were larcenies, 19 percent burglaries, and 16 percent motor vehicle thefts (not shown).
- The 5,747 burglaries reported in the San Diego region in the first half of 2014 represented a decrease of 17 percent from the first half of 2013 (when there were 6,921). Both residential and non-residential burglaries decreased to the same degree (-17% each). (Tables 1 and 8).
- The number of larcenies reported in the region at mid-year 2014 (19,798) represented a 12 percent drop from mid-year 2013, after two years with increases. Both petty theft (estimated value of items stolen \$400 and under) and grand theft decreased (by -8% and -17%, respectively) (Tables 1 and 8).
- Motor vehicle theft also decreased from mid-year 2013 to 2014. The drop from 5,655 vehicles stolen in 2013 to 5,004 in 2014 represented a twelve percent decline (Tables 1 and 8).
- There were 216 arsons reported by law enforcement in the first half of 2014, up from 179 for the first half of 2013, an increase of 21 percent (Tables 10 and 11).
- Across the jurisdictions, the number of property crimes decreased in 16 of the 19 jurisdictions, ranging from -3 percent (in La Mesa) to -37 percent (in Del Mar) (Table 7).

INSIGHTS: OTHER PROPERTY CRIME CHARACTERISTICS

Burglary

- Almost two-thirds (62%) of burglaries reported in the first half of 2014 were from a residence, not a non-residence (Figure 3).
- Over half (52%) of burglaries at mid-year 2014 involved entry through an open door or window, 34 percent were forced, and 11 percent were unsuccessful (not shown).

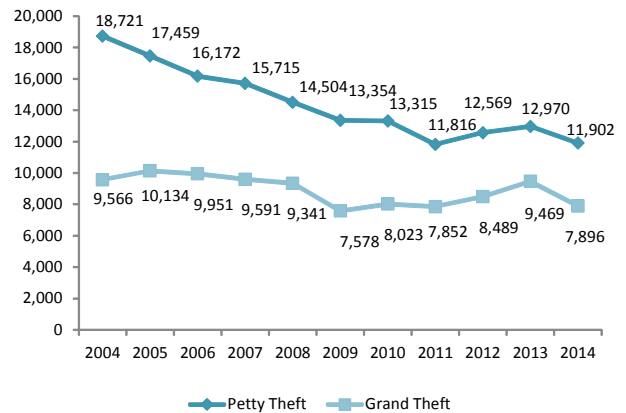

Figure 3
NUMBER OF BURGLARIES BY TYPE

Larceny

- At mid-year 2014, 40 percent of all larcenies involved property worth \$400 or more (grand theft) (Figure 4).

Figure 4
NUMBER OF LARCENIES BY TYPE

SOURCE: SANDAG, 2014

BACKGROUND

The ability for SANDAG to analyze data and produce reports on crime trends for the region relies upon a cooperative agreement with each local law enforcement agency. SANDAG obtains crime data from every agency on a monthly basis, enabling the agency to present regional crime data in a timely manner.

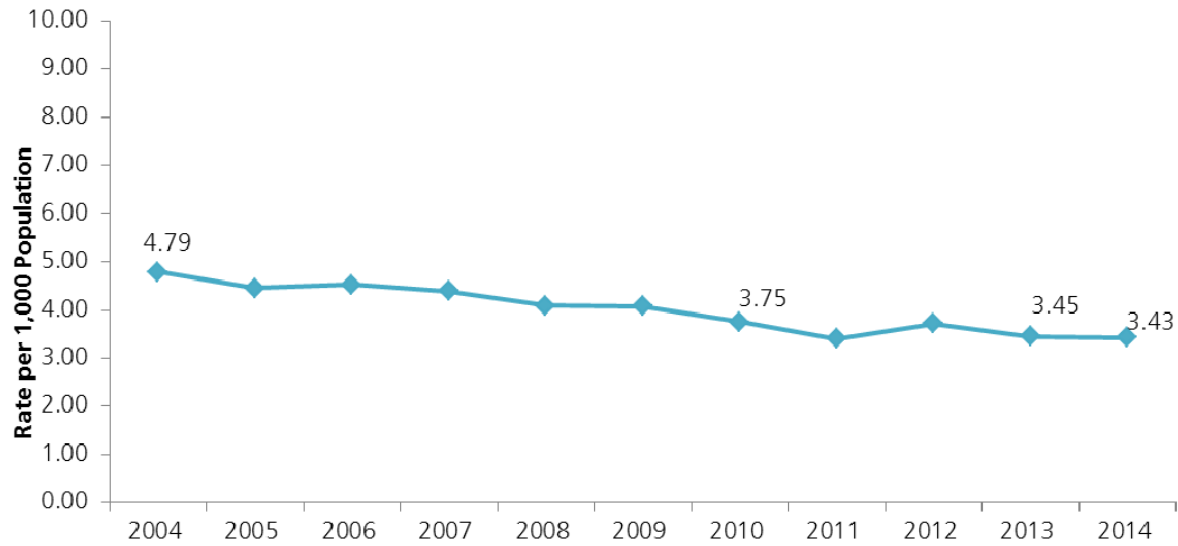

Crimes are categorized according to the FBI's standardized Uniform Crime Reporting (UCR) guidelines for law enforcement agencies across the country. Reported crimes are tallied in ARJIS according to the date of data entry, which may or may not reflect the day of occurrence. It should be noted that while local law enforcement agencies strive to tabulate their statistics in a timely fashion, data entry delays sometimes occur, which may affect statistics.

The mid-year crime rates per 1,000 residents are estimated by multiplying the number of crimes reported between January and June by two and dividing that number by the population which has been divided by 1,000.

The statistics presented in this CJ Bulletin include crime rates and numbers for San Diego County and individual jurisdictions for the first half of 2014. Comparisons are made to prior years. The number and type of crimes that are reported can be influenced by several factors, including the degree of opportunity to commit crimes in a given jurisdiction, which can be related to the amount of commercial land use and ease of access to the area.

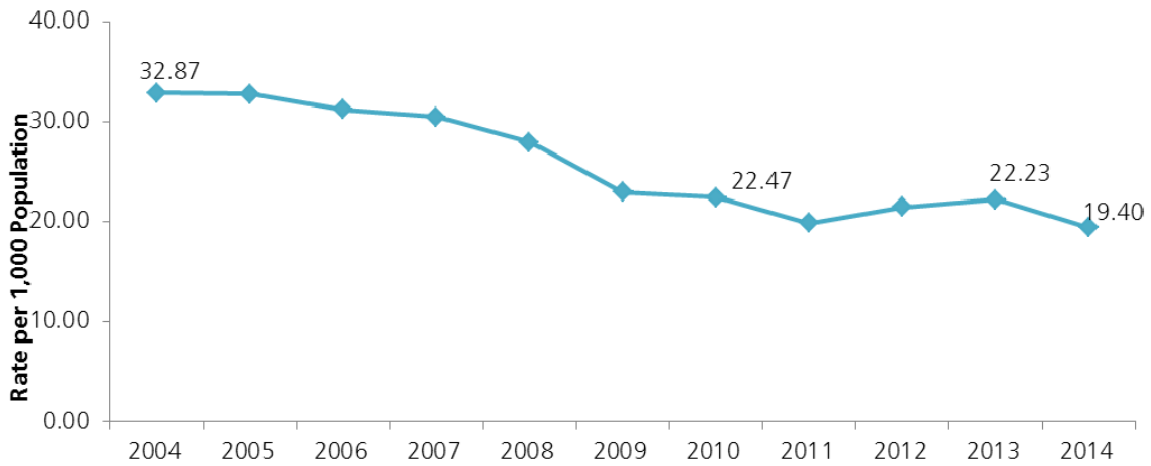

Crime statistics for January through December 2014 are expected to be available in April 2015. If you have any questions about these numbers, please contact the Criminal Justice Research Division at (619) 699-1900. For more information about the SANDAG Criminal Justice Clearinghouse, please visit our website at www.sandag.org/cj.

TOTAL	26.22	25.68	22.82	-13%	-11%

NOTES: The FBI Crime Index includes homicide, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft. "Sheriff-Total" includes the contract cities and the unincorporated area served by the San Diego County Sheriff's Department, as well as crime reported in the Sheriff's "other" category that includes the Sheriff's detention facilities, courts staffed by the Sheriff, and crimes reported to the Sheriff that were determined to have occurred in a city not served by the Sheriff or at a location for which jurisdiction could not be determined. As of September 2013, the Sheriff's "other" category included crimes occurring in the Grossmont/Cuyamaca Community College District; and in May 2014, it included the San Diego County Administration building and surrounding park area. "Unincorporated" includes 4S Ranch (began reporting separately July 2007), Alpine, Fallbrook, Lakeside, Ramona, Spring Valley, and Valley Center, as well as the unincorporated areas for which crime data are not individually shown (Campo, Julian, Pine Valley, Ranchita, and the unincorporated areas of Encinitas, Imperial Beach, Lemon Grove, Poway, San Marcos, Santee, and Vista). The annualized crime rate per 1,000 population reflects the number of incidents reported in the first six months of the year, times two, divided by the population which has been divided by 1,000. Percent changes are not presented if either comparison number used to compute the crime rate equals 30 or less. Populations used to compute crime rates reflect the most current finalized California Department of Finance estimates, December 2013.

Ramona	14.46	8.67	7.68	-47%	-11%
Spring Valley	19.17	12.57	12.13	-37%	-4%
Valley Center	15.30	15.53	12.55	-18%	-19%
TOTAL FBI INDEX PROPERTY	22.47	22.23	19.40	-14%	-13%

NOTES: The FBI Crime Index includes homicide, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft. "Sheriff-Total" includes the contract cities and the unincorporated area served by the San Diego County Sheriff's Department, as well as crime reported in the Sheriff's "other" category that includes the Sheriff's detention facilities, courts staffed by the Sheriff, and crimes reported to the Sheriff that were determined to have occurred in a city not served by the Sheriff or at a location for which jurisdiction could not be determined. As of September 2013, the Sheriff's "other" category included crimes occurring in the Grossmont/Cuyamaca Community College District; and in May 2014, it included the San Diego County Administration building and surrounding park area. "Unincorporated" includes 4S Ranch (began reporting separately July 2007), Alpine, Fallbrook, Lakeside, Ramona, Spring Valley, and Valley Center, as well as the unincorporated areas for which crime data are not individually shown (Campo, Julian, Pine Valley, Ranchita, and the unincorporated areas of Encinitas, Imperial Beach, Lemon Grove, Poway, San Marcos, Santee, and Vista). The annualized crime rate per 1,000 population reflects the number of incidents reported in the first six months of the year, times two, divided by the population which has been divided by 1,000. Percent changes are not presented if either comparison number used to compute the crime rate equals 30 or less. Populations used to compute crime rates reflect the most current finalized California Department of Finance estimates, December 2013.

NOTES: The FBI Crime Index includes homicide, rape, robbery, and aggravated assault in the violent category and burglary, larceny, and motor vehicle theft in the property category. The California Crime Index (CCI) includes all FBI Index crimes except larceny. "Sheriff-Total" includes the contract cities and the unincorporated area served by the Sheriff, as well as crimes reported in the Sheriff's "other" category that includes the Sheriff's detention facilities, courts staffed by the Sheriff, and crimes reported to the Sheriff that occurred in a city not served by the Sheriff or a location for which jurisdiction could not be determined. As of September 2013, the Sheriff's "other" category included crimes occurring in the Grossmont/Cuyamaca Community College District.

NOTES: Populations used to compute crime rates reflect the most current finalized California Department of Finance estimates, December 2013. "Sheriff-Total" includes contract cities and the unincorporated area served by the San Diego County Sheriff's Department. Pendleton population is excluded from Sheriff's unincorporated area and included in the region total. "Unincorporated" includes 4S Ranch, Alpine, Fallbrook, Lakeside, Ramona, Spring Valley, and Valley Center, as well as the unincorporated areas not shown (Campo, Julian, Pine Valley, Ranchita, and the unincorporated areas of Encinitas, Imperial Beach, Lemon Grove, Poway, San Marcos, Santee, and Vista).
